Lavishly illustrated with over 300 pictures, including more than 200 in full color, The Oxford History of Islam offers the most wide-ranging and

authoritative account available of the second largest--and fastest growing--religion in the world. John L. Esposito, Editor-in-Chief of the four-volume Oxford Encyclopedia of the Modern Islamic World, has gathered together sixteen leading scholars, both Muslim and non-Muslim, to examine the origins and historical development of Islam--its faith, community, institutions, sciences, and arts. Beginning in the pre-Islamic Arab world, the chapters range from the story of Muhammad and his Companions, to the development of Islamic religion and culture and the empires that grew from it, to the influence that Islam has on today's world. The book covers a wide array of subjects,

casting light on topics such as the historical encounter of Islam and Christianity, the role of Islam in the Mughal and Ottoman empires, the growth of Islam in Southeast Asia, China, and Africa, the political, economic, and religious challenges of European imperialism in the nineteenth and twentieth centuries, and Islamic communities in the modern Western world. In addition, the book offers excellent articles on Islamic religion, art and architecture, and sciences as well as bibliographies. Events in the contemporary world have led to an explosion of interest and scholarly work on Islam. Written for the general reader but also appealing to specialists, The Oxford

History of Islam offers the best of that recent scholarship, presented in a readable style and complemented by a rich variety of illustrations.

### **The Vision Of The Qur'an**

Oxford University Press, USA

Continuing her journey from a deeply religious Islamic upbringing to a post at Harvard, the brilliant, charismatic

and controversial New York Times and Globe and Mail #1 bestselling author of *Infidel* and *Nomad* makes a powerful plea for a Muslim Reformation as the only way to end the horrors of terrorism, sectarian warfare and the repression of women and minorities. Today, she argues, the world's 1.6 billion Muslims can be divided into a minority of extremists, a majority of observant but peaceable Muslims and a few dissidents who risk their lives by questioning their own religion. But there is only one Islam and, as Hirsi Ali shows, there is no denying that some of its key teachings—not least the duty to wage holy war—are incompatible with the values of a free society. For

centuries it has seemed as if Islam is immune to change. But Hirsi Ali has come to believe that a Muslim Reformation—a revision of Islamic doctrine aimed at reconciling the religion with modernity—is now at hand, and may even have begun. The Arab Spring may now seem like a political failure. But its challenge to traditional authority revealed a new readiness—not least by Muslim women—to think freely and to speak out. Courageously challenging the jihadists, she identifies five key amendments to Islamic doctrine that Muslims have to make to bring their religion out of the seventh century and into the twenty-first. And she calls on the Western

world to end its appeasement of the Islamists. “Islam is not a religion of peace,” she writes. It is the Muslim reformers who need our backing, not the opponents of free speech. Interweaving her own experiences, historical analogies and powerful examples from contemporary Muslim societies and cultures, *Heretic* is not a call to arms, but a passionate plea for peaceful change and a new era of global toleration. In the wake of the Charlie Hebdo murders, with jihadists killing thousands from Nigeria to Syria to Pakistan, this book offers an answer to what is fast becoming the world’s number one problem. **Heretic** Cambridge University Press  
The contrast between

religion and law has been continuous throughout Muslim history. Islamic law has always existed in a tension between these two forces: God, who gave the law, and the state--the sultan--representing society and implementing the law. This tension and dynamic have created a very particular history for the law--in how it was formulated and by whom, in its theoretical basis and its actual rules, and in how it was practiced in historical reality from the time of its formation until today. That is the main theme of this book. Knut S. Vikor introduces the development and practice of Islamic law to a wide readership: students, lawyers, and the growing number of those interested in

Islamic civilization. He summarizes the main concepts of Islamic jurisprudence; discusses debates concerning the historicity of Islamic sources of dogma and the dating of early Islamic law; describes the classic practice of the law, in the formulation and elaboration of legal rules and practice in the courts; and sets out various substantive legal rules, on such vital matters as the family and economic activity.

An Approach to the Quranic Sciences

Cambridge University Press

The 30 scholars and activists who contributed to this book do not necessarily agree on every issue, however, they all agree on the

imperative of a radical reformation in the Muslim world--a reform under the guidance of the Quran with the light of reason.

*The Lives and Teaching of Their Founders*  
Princeton University Press

This pioneering study examines the process of reasoning in Islamic law. Some of the key questions addressed here include whether sacred law operates differently from secular law, why laws change or stay the same and how different cultural and historical settings impact the development of legal rulings. In order to explore these questions, the author examines the decisions of thirty jurists from the largest legal tradition in Islam: the Hanafi school of law.

He traces their rulings on the question of women and communal prayer across a very broad period of time - from the eighth to the eighteenth century - to demonstrate how jurists interpreted the law and reconciled their decisions with the scripture and the sayings of the Prophet. The result is a fascinating overview of how Islamic law has evolved and the thinking behind individual rulings.

khalid siddiqui

This book documents and highlights the Deobandi dimension of extremism and its implications for faith-based violence and terrorism. This dimension of radical Islam remains largely ignored or misunderstood in mainstream media and

academic scholarship. The book addresses this gap. It also covers the Deobandi diaspora in the West and other countries and the role of its radical elements in transnational incidents of violence and terrorism. The specific identification of the radical Deobandi and Salafi identity of militants is useful to isolate them from the majority of peaceful Sunni and Shia Muslims. Such identification provides direction to governmental resources so they focus on those outfits, mosques, madrassas, charities, media and social medial channels that are associated with these ideologies. This book comes along at a time when there is a dire need for alternative and

contextual discourses on terrorism.

**The Muslim World After 9/11** Edinburgh University Press

In this book, Amr Osman presents a new reading of both the history and doctrine of the Zāhirī madhhab, from its emergence in the 3rd/9th century to its demise in the 10th/16th century.

A History of Islamic Law Simon and Schuster

This book reflects upon the political philosophy of Muhammad Iqbal, a towering intellectual figure in South Asian history, revered by many for his poetry and his thought. He lived in India in the twilight years of the British Empire and, apart from a short but significant period studying in the West, he remained in Punjab

until his death in 1938. The book studies Iqbal's critique of nationalist ideology and his attempts to chart a path for the development of the 'nation' by liberating it from the centralizing and homogenizing tendencies of the modern state structure. Iqbal frequently clashed with his contemporaries over his view of nationalism as 'the greatest enemy of Islam'. He constructed his own particular interpretation of Islam - forged through an interaction with Muslim thinkers and Western intellectual traditions - that was ahead of its time, and since his death both modernists and Islamists have continued to champion his legacy.

This is an anthology of the most significant writing on the doctrinal, intellectual, and spiritual dimensions of Shicim. The works included here foster an interpretive understanding of Shicim in its dogmatic and cognitive aspects. The intent of this book is to balance the attention that has been focused on the political aspect of Shicim. Shicim is often seen, not only as an essentially political phenomenon, but as a creed of violence.  
Understanding Shicim

in its total reality will encourage a more balanced approach to issues which are viewed mostly politically. While not denying the importance of political manifestations, this book offers an understanding of the often neglected religious beliefs and spiritual practices of this world community. *Faith-Based Violence and Deobandi Militancy in Pakistan* Cambridge University Press

This book discusses the common principles of morality and ethics derived from divinely endowed intuitive reason through the creation of al-fitr' a (nature) and human intellect (al-'aql). Biomedical topics are presented and ethical issues related to topics such as genetic

testing, assisted reproduction and organ transplantation are discussed. Whereas these natural sources are God's special gifts to human beings, God's revelation as given to the prophets is the supernatural source of divine guidance through which human communities have been guided at all times through history. The second part of the book concentrates on the objectives of Islamic religious practice - the maqa' sid - which include: Preservation of Faith, Preservation of Life, Preservation of Mind (intellect and reason), Preservation of Progeny (al-nasl) and Preservation of Property. Lastly, the third part of the book discusses selected

topical issues, including abortion, assisted reproduction devices, genetics, organ transplantation, brain death and end-of-life aspects. For each topic, the current medical evidence is followed by a detailed discussion of the ethical issues involved.

**Born a Muslim** Oxford University Press, USA

This volume brings together some of the many unheard voices of scholars studying law and ethics within Muslim societies. It features over 200 abstracts with bibliographical details in three languages

(English, Arabic and Turkish), giving access to information about original post-1800 scholarly publications from Muslim contexts in the fields of law and ethics from different Muslim societies. The volume highlights the diversity of interpretations of law and ethics across these societies and creates access to, and reinforces communication between, scholars and institutions where sharing of knowledge and information has often been hindered by language barriers. -- jacket.
