Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. Veloce Publishing Ltd

Simplified Signs presents a system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages. It is the culmination of over twenty years of research and development by the authors. The Simplified Sign System has been developed and tested for ease of sign comprehension, memorization, and formation by limiting the complexity of the motor skills required to form each sign, and by ensuring that each sign visually resembles the meaning it conveys. Volume 1 outlines the research underpinning and informing the project, and places the Simplified Sign System in a wider context of sign usage, historically and by different populations. Volume 2 presents the lexicon of signs, totalling approximately 1000 signs, each with a clear illustration and a written description of how the sign is formed, as well as a memory aid that connects the sign visually to the meaning that it conveys. While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities, cerebral palsy, autism, or aphasia, it may also assist the communication needs of a wider audience - such as healthcare professionals, aid workers, military personnel, travellers or parents, and children who have not yet mastered spoken language. The system also has been shown to enhance learning for individuals studying a foreign language. Lucid and comprehensive, this work constitutes a valuable resource that will enhance the communicative interactions of many different people, and will be of great interest to researchers and educators alike.

A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant

primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

Haynes Manuals N. America, Incorporated

The automobile seems to be as popular now as it ever was. Posters of cars still adorn many a child's bedroom wall, and school exercise books are full of doodles of cars. This book takes those notebook sketches and teaches you how to develop them into the car designs you see in magazines. Using simple to follow step-by-step drawings it guides you from pencil sketch to marker rendering, from doodle to highly visual computer generated artwork. Adrian Dewey has worked on designs as diverse as small sports cars to double decker buses, modified motors to concept Formula 1 cars, using various techniques and styles. In this book, he uses his knowledge of the different styles to guide the reader in creating great artwork and designs of their own. The book shows in detail how to use different materials and how to get the most out of each one, whether it be a great pencil sketch or a photo realistic vector illustration. The book also features an easy to follow index for quick reference on different types of drawing.

Kawasaki Z1, Z/KZ900 & Z/KZ1000 is for all owners and enthusiasts of the legendary Kawasaki Z1 900, Z/KZ900 and Z1000 built between 1972 and 1980. The book covers the complete restoration of a 1976 KZ900, from the sourcing of the bike to its completion as a fully restored machine. Every area is covered starting with advice on the different models, spares availability, and where best to source a bike to restore. Every area of the restoration is then covered in full detail including the engine, frame, gearbox, wheels, suspension and forks, brakes, ancillaries, bodywork and electrics, accompanied by hundreds of clear color photos to illustrate the text. Additional work on a 1974 Z1A model adds complementary information. What really sets this manual apart, however, is the style in which it is written: not as some dull and distant workshop manual but in a friendly, humorous manner by an enthusiast of many years who is able to involve and entertain the reader, as well as guiding them through the restoration process. This is the third restoration guide from Chris Rooke, whose previous works have been a massive hit with mechanics, enthusiasts and restorers throughout the world.
