The Romantic period was one of the most creative, intense and turbulent periods of English literature, an age marked by revolution, reaction, and reform in politics, and by the invention of imaginative literature in its distinctively

modern form. This History presents an engaging account of six decades of literary production around the turn of the nineteenth century. Reflecting the most up-to-date research, the essays are designed both to provide a narrative of Romantic literature, and to offer new and stimulating readings of the key texts. One group of essays addresses the various locations of literary activity – both in England and, as writers developed their interests in travel and foreign cultures, across the world. A second set of essays traces how texts responded to great historical and social change. With a comprehensive bibliography, timeline and index, this volume will be an important resource for research and teaching in the field.

Dramatic changes in the reading public and literary market in early nineteenth-century England not only altered the relationship between poet and reader,

these changes prompted marked changes in conceptions of the poetic text, literary reception, and authorship. With the decline of patronage, the rise of the novel and the periodical press, and the emergence of the mass reading public, poets could no longer assume the existence of an audience for poetry. Andrew Franta examines how the reconfigurations of the literary market and the publishing context transformed the ways poets conceived of their audience and the forms of poetry itself. Through readings of Wordsworth, Byron, Shelley, Keats, Hemans, and Tennyson, and with close attention to key literary, political, and legal debates, Franta proposes a unique reading of Romanticism and its contribution to modern conceptions of politics and publicity.

'Romanticism', though a debated term, is broadly understood as a cultural movement which gripped the European imagination in the late eighteenth and early nineteenth centuries. Embodying a poetics of feeling intersecting with nature and the notion of the sublime, its experiential aesthetics were furthermore bound up with ideas of personal and political rebellion. Michael Ferber's lively anthology includes lesser-known verse from the best-known poets, as well as a few fine poems by little-known poets. Perfect for readers who would like to enjoy the many riches of arguably poetry's greatest era, or for those already familiar with the poets but who

would welcome some happy surprises, this varied international selection includes verse translated from six languages, with several poems appearing in the original language alongside its translation. This engaging selection features concise, informative headnotes and a helpful introduction that charts a course to understanding the Romantic movement as a whole.

*An Anthology* English Literature from the Restoration Through the Romantic Period

Named a CHOICE Outstanding Academic Title for 2009 *Romanticism and the Rise of English* addresses a peculiar development in contemporary literary criticism: the disappearance of the history of the English language as a relevant topic. Elfenbein argues for a return not to older modes of criticism, but to questions about the relation between literature and language that have vanished from contemporary investigation. His book is an example of a kind of work that has often been called for but rarely realized—a social philology that takes seriously the formal and institutional forces shaping the production of English. This results not only in a history of English, but also in a recovery of major events shaping English studies as a coherent discipline. This book points to new directions in literary criticism by arguing for the need to reconceptualize authorial agency in light of a broadened understanding of linguistic history.

*Eighteenth Century and the Romantic Age* Gale / Cengage Learning

First published in 1981. The primary purpose of this book is to serve as an introduction to writing in the late eighteenth and early nineteenth centuries. In addition to major Romantic poets – Blake, Wordsworth, Coleridge and Shelly – the authors discuss writers such as Austen, Hazlitt and Burke, who are usually studied in a different context, and genres such as fiction and political writing, which are often cut off from the central body of poetry. An original and highly stimulated study, this book will appeal to all those who are dissatisfied with the conventional categories into which writers and literary movements are usually placed. .

The eighteenth century witnessed the

rapid expansion of social, political, religious and literary networks in Great Britain. Increased availability of and access to print combined with the ease with which individuals could correspond across distance ensured that it was easier than ever before for writers to enter into the marketplace of ideas. However, we still lack a complex understanding of how literary networks functioned, what the term 'network' means in context, and how women writers in particular adopted and adapted to the creative possibilities of networks. This collection of essays address these issues from a variety of perspectives, arguing that networks not only provided women with access to the literary marketplace, but fundamentally altered how they related to each other, to their literary production, and to the broader social sphere. By examining the texts and networks of authors as diverse as Sally Wesley, Elizabeth Hamilton, Susanna Watts, Elizabeth Heyrick, Joanna Baillie, Mary Berry, Mary Russell Mitford, Mary Shelley and Elizabeth Barrett Browning, this volume demonstrates that attention to the scope and influence of women's literary networks upends long standing assumptions about gender, literary influence and authorial formation during the Romantic period. Furthermore, it suggests that we must rethink what counts as literature in the Romantic period, how we read it, and how we draw the boundaries of Romanticism.

*Romanticism and the Letter* is a collection of essays that explore various aspects of letter writing in the Romantic period of British Literature. Although the correspondence of the Romantics

constitutes a major literary achievement in its own right, it has received relatively little critical attention. Essays focus on the letters of major poets, including Wordsworth, Byron, Shelley and Keats; novelists and prose writers, including Jane Austen, Leigh Hunt and Charles Lamb; and lesser-known writers such as Melesina Trench and Mary Leadbeater. Moving from theories of letter writing, through the period's diverse epistolary culture, to essays on individual writers, the collection opens new perspectives for students and scholars of the Romantic period.

This book shows why Keats and Romanticism appeal to the Japanese mind, and how English Romantic poetry has found its way into Japanese literature. The first part analyses the reception of Romanticism in Japan before and after World War II and then focuses on the Japanese reception of Keats and the translation of Keats' poetry. The second part of the book deals with the medical aspect in Keats' poetry, his treatment of the supernatural, and his distinctive use of words.

Romanticism and the Letter Routledge

This open anthology of British Literature encompasses the following eras:

Romantic, Victorian, and Twentieth

Century and Beyond. The selections

represent the literature developed and

developing within and through their

respective eras. Considering the

limitations that the very act of

anthologizing imposes, not all that could

be representative is included. But what

is included, hopefully, is literature that

was shaped by its era and that helped

shape the literature that followed. This

anthology includes contextualizing

Introductions to each era, Biographies of

each author, and Reading and Review

Questions on each author's included

works. This material offers basic signposts toward critical interpretation and understanding of the selections. But they do not impose or intend to shape that understanding so students can instead hone their critical thinking skills and synthesize historical, cultural, and aesthetic concepts. With this open anthology, students can compare the selections both within and across historical eras to analyze shared themes. The theme of personal identity as inherent or as socially constructed opens a constellation of related themes, many of which students may take for granted or have not critically examined. Students can understand the revolutionary aspects of the Romantic era by considering how static and determined class distinctions of the eighteenth century became more fluid and conditional in the nineteenth century. They can understand how the Romantics, seeing past sources of identity within a stable class system catastrophically disrupted by revolutionary forces across Europe and ultimately within England, considered universal elements of individuality that were shared across all classes and that demonstrated fundamental equality among humans. Imagination became a touchstone of such shared humanity. Considering the theme of Imagination opens related themes of dream and nightmare, happiness and terror, truth and doubt (or self-truths and self-doubts). Categories of identity constructs--such as hero and monster--similarly become conditional or conditioned, for example, upon self-realization and social limitations.

Students can consider how one era's literature influenced the next. Victorian poetry can suggest how revelation of self could be made objective and impersonal through dramatized monologues. A speaker's point of view can reveal truths about humanity--such as jealousy, control, hatred, and greed--that evoke both sympathy and rejection. Impersonality can then lead to the shifting impersonations of Modern literature. Ego and egotism can be deplored by Victorian writers but desired by the Moderns. The horrors of the twentieth century can subvert the heroics of the nineteenth. And the realization of these horrors can grow out of the very sense of individual rights that the Romantics expressed--rights shared across gender, race, and class. This anthology hopefully will open students (and readers) to the conversation that literature has held with readers in the past and is holding with us now.

ENGLISH ROMANTIC WRITERS offers selections from authors who have traditionally held a large place in our consciousness of English Romanticism, but it also includes other figures--especially women--who have been less emphasized in the past. The intellectual discourses of the age concerning governance, politics, the impact of the French Revolution, gender and the status of women, the nature of nature and of human psychology, and the theory of literature and art are represented in the prose and poetry of writers like Wordsworth, Coleridge, the Shelleys, and Keats.
