In this collection of his best poems, Bruce F. Kawin explores many aspects of love, from the romantic to the

metaphysical and from sex to mourning. The breadth of voice and form is masterful, and the poems are bold and evocative. As complex as they are, they relate plainly to real life. The book includes a sestina about a harried woman, a sonnet sequence reimagined as a slide show, a menu of potential love stories, a lesbian epic set in modern Greece and reimagined versions of old horror films, all of them charged with startling, moving and convincing visions of love. With his unique tone and subject matter, his good stories, his striking insights and his fresh, vivid language, Kawin reinvents and revives the love poem.

FREEDOM IS THE ONLY THING WORTH DYING FOR." I interrupted, "Shouldn't it be that freedom is worth living for?" "My God," replied Garlic. "Why did I have to get you? Look, candy is worth living for. In the present book, *How to Win Friends and Influence People*, Dale Carnegie says, "You can make someone want to do what you want them to do by seeing the situation from the other person's point of view and arousing in the other person an eager want." You learn how to make people like you, win people over to your way of thinking, and change people without causing offense or arousing resentment. For instance, "let the other person feel that the idea is his or hers" and "talk about your own mistakes before criticizing the other person." This book is all about building relationships. With good relationships, personal and business successes are easy and swift to achieve. *Twelve Ways to Win People to Your Way of Thinking*

1. The only way to get the best of an argument is to avoid it.

This book, first published in 1993, addresses important questions about the future that libraries need to answer today such as: What will change for serials librarians, vendors, and publishers as ink and paper become the oddity and electronic transmitters and receivers become the norm? What services will be in demand and who will provide them? Which economic models will keep them afloat? Most importantly, can the disparate groups currently active in scholarly communication work together to build the physical, social, and economic backbone of a new model? This book is an invaluable guide to the future of serials librarianship. It describes new technologies, predicts how the publishing industry will develop in the near future, and explores how the library may evolve within a new system of scholarly communication. Just a few of the exciting topics covered include the development of standards for networking technologies; the shift from ownership to access in libraries as a result of electronic information; the history of scholarly communication; copyright of electronic data; higher education in the 1990s; and marketing in libraries.

If We Were Electric's twelve stories celebrate New Orleans in all of its beautiful peculiarities: macabre and magical, muddy and exquisite, sensual and spiritual. The stunning debut collection finds its characters in moments of desire and despair, often stuck on the verge of a great metamorphosis, but burdened by some unreasonable love. These are stories about missed opportunities, about people on the outside who don't fit in, about the consequences of not mustering enough courage to overcome the binds. In "Feux Follet," an old man's grief attracts supernatural lights in the dark Louisiana swamps. An exploding transformer's raw, unnerving energy in the title story matches the strange, ferocious temper of an unlucky hustler. "Blackout" sets the profound numbness of a young man physically abused by his mentally unstable partner beside the meaningful beauty of an unexpected moment of joy with someone else. The teenage narrator in "Before Las Blancas" is so overwhelmed by his sexuality that he abandons everything and everyone he's known to live in a happy illusion . . . in Mexico. And "Where It Takes Us" is a

poignant, understated snapshot of a gay man who accompanies his straight, HIV-positive brother to the race track to bond again.

Do service-sector workers represent the future of the U.S. labor movement? Mid-

twentieth-century union activism transformed manufacturing jobs from backbreaking, low-wage work into careers that allowed workers to buy homes and send their kids to college. Some union activists insist that there is no reason why service-sector workers cannot follow that same path. In *If We Can Win Here*, Fran Quigley tells the stories of janitors, fry cooks, and health care aides trying to fight their way to middle-class incomes in Indianapolis. He also chronicles the struggles of the union organizers with whom the workers have made common cause. The service-sector workers of Indianapolis mirror the city's demographics: they are white, African American, and Latino. In contrast, the union organizers are mostly white and younger than the workers they help rally. Quigley chronicles these allies' setbacks, victories, bonds, and conflicts while placing their journey in the broader context of the global economy and labor history. As one Indiana-based organizer says of the struggle being waged in a state that has earned a reputation as antiunion: "If we can win here, we can win anywhere." The outcome of the battle of Indianapolis may foretell the fate of workers across the United States.

A game-changing account of the deep roots of political polarization in America, including an audacious fourteen-point agenda for how to fix it. Why has American politics fallen into such a state of horrible dysfunction? Can it ever be fixed? These are the questions that motivate Michael Tomasky's deeply

original examination into the origins of our hopelessly polarized nation. "One of America's finest political commentators" (Michael J. Sandel), Tomasky ranges across centuries and disciplines to show how America has almost always had two dominant parties that are existentially, and often violently, opposed. When he turns to our current era, he does so with striking insight that will challenge readers to reexamine what they thought they knew. Finally, not content merely to diagnose these problems, Tomasky offers a provocative agenda for how we can help fix our broken political system—from ranked-choice voting and at-large congressional elections to expanding high school civics education nationwide. Combining revelatory data with trenchant analysis, Tomasky tells us how the nation broke apart and points us toward a more hopeful political future.

When I tell someone I play Dodgeball, they normally respond with, "I haven't played that since grade school." The sad thing is, our overprotective society has started banning the sport in schools across the country. They feel it's too dangerous, and that it encourages bullies to pick on weaker students. I however, see the game differently. In Dodgeball, anyone can be the hero on any day, in any game. Your position does not dictate your playtime or importance. This book is written for those who love the game or for those who are curious and want to learn more. Whether the game is being banned in schools or kids are too scared to play, the future of the game is in jeopardy. So then those who show up to play now are there because they want to be, and it's their duty to pass on the game to others. So buy this book, and I'll see you on the courts. The American people are frustrated with their government-dismayed by a series of high-profile failures (Iraq, Katrina, the financial meltdown) that seems to just keep getting longer. Yet the US has a proud history of great achievements: victory in World War II, the national highway system, welfare reform, the moon landing. The US need more successes like these to reclaim the government's legacy of competence. In *If We Can Put a Man on the Moon*, William Eggers and John O'Leary explain how to do it. The key? Understand-and avoid-the common pitfalls that trip up public-sector leaders during the journey from idea to results. The authors recount surprisingly entertaining stories of public policy initiatives that succeeded beyond all imagination, including the Marshall Plan, the 1996 welfare reform and London's Congestion Charge. They also find lessons in failures, including Boston's Big Dig and the Challenger disaster. *If We Can Put a Man on the Moon* shows how government really works with an optimistic and non-partisan look at the kinds of large government endeavors that have shaped US history and that are unfolding in the news right now. Ultimately, however, the authors show us that good ideas are just the beginning of a successful initiative. With proper design, commitment, implementation and re-evaluation, our leaders can once again accomplish big things. The authors identify pitfalls including: The Partial Map Trap: Fumbling handoffs throughout project execution The Tolstoy Syndrome: Seeing only the possibilities you want to see Design-Free Design: Designing policies for passage through the

legislature, not for implementation The Overconfidence Trap: Creating unrealistic budgets and timelines The Complacency Trap: Failing to recognize that a program needs change At a time of unprecedented challenges, this book, with its abundant examples and hands-on advice, is the essential guide to making government work better. A must-read for every public official, this book will be of interest to anyone who cares about the future of democracy.
