This book, first published in 1984, aims to bring together the interests of the theory and practice of the education system and, within the former, relate the approaches and claims of the constituent disciplines to each other. Throughout the book, while arguing for the importance of facing up to the logical links between theory and practice, the author seeks to point out the extent to which more educational theory has had little to say of importance for practice, either because it has been a poor theory or because it has concerned itself

with matters of little significance to educators. This book will be of interest to students of education, as well as educators themselves.

"This book offers an
updated and
comprehensive
phenomenology of norms
and normativity. It is the
first volume that
systematically tackles
both the normativity of
experiencing and various
experiences of norms.
Part I begins with a
discussion of the
methodological resources
that phenomenology
offers for the critique of
epistemological, social
and cultural norms. It
argues that these
resources are powerful
and have largely been
neglected in
contemporary philosophy
as well as social and
human sciences. The
second part deepens the
discussion by studying the
existential and moral-
philosophical foundations
of practical normativity. It
takes on the task of
illuminating the origins of
normativity and offers
phenomenological
alternatives to the neo-
Kantian and neo-Hegelian
approaches that dominate
contemporary debates on
the sources of
normativity. The final part
proceeds from practical
normativity to the
analysis of the guiding
powers of values,

perceptual norms, instincts and drives. These are different forms of intentionality that in various manners contribute to the constitution of human practices. By clarifying their divergences and their interrelations, the volume demonstrates that normativity is not one phenomenon but a complex set of various phenomena, with multiple origins and sources.

Contemporary Phenomenologies of Normativity will be of interest to researchers and advanced students working on issues of normativity in phenomenology, epistemology, ethics, and social philosophy"--

and eliminating barriers. **Advanced Listening and Note-taking Skills. Teacher's pack** Allyn & Bacon This book traces the history of engagements between dance and the visual arts in the mid-twentieth century and provides a backdrop for the emerging field of contemporary, intermedial art practice. Exploring the disciplinary identity of dance in dialogue with the visual arts, this book unpacks how compositional methods that were dance-based informed visual art contexts. The book provokes fresh consideration of the entangled relationship between, and historiographic significance of, visual arts and dance by exploring movements in history that dance has been traditionally mapped to (Neo-Avant Garde, Neo-Dada, Conceptual art, Postmodernism, and Performance Art) and the specific practices and innovations from key people in the field (like John Cage, Anna Halprin, and Robert Rauschenberg). This book also employs a series of historical and critical case studies which show how compositional approaches

from dance--breath, weight, tone, energy--informed the emergence of the intermedial. Ultimately this book shows how dance and choreography have played an important role in shaping visual arts culture and enables the re-imagination of current art practices through the use of choreographic tools. This unique and timely offering is important reading for those studying and researching in visual and fine arts, performance history and theory, dance practice and dance studies, as well as those working within the fields of dance and visual art.
