KENT BRIA

Atlas of Dermatoses in Pigmented Skin

National Geographic Books
This atlas is aimed at collecting, compiling and disseminating information on mental health resources in the world. It presents updated and expanded information from 192 countries with analyses of global and regional trends as well as individual country profiles. Newly included in this volume is a section on epidemiology within the profiles of all low and middle income countries. It shows that mental health resources within most countries remain inadequate despite modest improvements since 2001. Availability of mental health resources across countries and between regions remains substantially uneven, with many countries having few resources. The atlas reinforces the urgent need to enhance mental health resources within countries.

Natural Disaster Hotspots Case Studies

Routledge

Essentials of Medical Geology reviews the essential concepts and practical tools required to tackle environmental and public health problems. It is organized into four main sections. The first section deals with the fundamentals of environmental biology, the natural and anthropogenic sources of health elements that impact health and illustrate key biogeochemical transformations. The second section looks at the geological processes influencing human exposure to specific elements, such as radon, arsenic, fluorine, selenium and iodine. The third section presents the concepts and techniques of pathology, toxicology and epidemiology that underpin investigations into the human health effects of exposure to naturally occurring elements. The last section provides a toolbox of analytical approaches to environmental research and medical geology investigations. Essentials of Medical Geology was first published in 2005 and has since won three prestigious rewards. The book has been

recognized as a key book in both medical and geology fields and is widely used as textbook and reference book in these fields. For this revised edition, editors and authors have updated the content that evolved a lot during 2005 and added two new chapters, on public health, and agriculture and health. This updated volume can now continue to be used as a textbook and reference book for all who are interested in this important topic and its impacts the health and wellbeing of many millions of people all over the world. · Addresses key topics at the intersection of environmental science and human health · Developed by 60 international experts from 20 countries and edited by professionals from the International Medical Geology Association (IMGA) · Written in non-technical language for a broad spectrum of readers, ranging from students and professional researchers to policymakers and the general public · Includes color illustrations throughout, references for further investigation and other aids to the reader

Secessionism and Separatism in Europe and Asia Pearson Education South Asia
Annotated bibliography covering books, journal articles, working papers, and other material on topics in population and demography.

Historical Dictionary of Sri Lanka IWMI
Find out all about our world today with the new edition of this reference atlas From the defining boundaries of the Balkan states to the icy terrain of Antarctica over 400 maps created with the latest digital mapping techniques and satellite data are combined to bring you Earth in more detail than ever before. Terrain models reveal physical features, while informative text, photographs and diagrams provide a superb overview of the physical,

political, economic and demographic geography of the world. Detailed fact files on all 193 nations, including each region's land use, industrial activities and population distribution. Plus a 75,000 index-gazetteer makes this an essential desktop reference for business, home, or school use. Visit www.dk.com/worldfactfile to find out more about the world's 193 countries, from maps and historical information to up-to-date statistics.

An Atlas and Survey of South Asian History Earthscan

Methods in World History is the first international volume that systematically addresses a number of methodological problems specific to the field of world history. Prompted by a lack of applicable works, the authors advocate a considerable sharpening of the tools used within the field of study. Theories constructed on poor foundations run an obvious risk of reinforcing flawed assumptions, and of propping up other, more ideological, constructions. The dedicated critical approach outlined in this volume helps to mitigate such risks. Each author addresses a particular issue of method – for source criticism, archaeological evidence or estimates of economies for example – discussing the problems, giving practical examples, and offering solutions and ways of overcoming the difficulties involved. The perspectives are varied, the criticism focussed, and a common theme of coalescence is maintained throughout. This unique anthology will be of great use to advanced scholars of world history, and to students entering the field for the first time.

Reference World Atlas Springer

In this ground-breaking collection of essays, the editors and authors develop the idea of Linguistic Citizenship. This

notion highlights the importance of practices whereby vulnerable speakers themselves exercise control over their languages, and draws attention to the ways in which alternative voices can be inserted into processes and structures that otherwise alienate those they were designed to support. The chapters discuss issues of decoloniality and multilingualism in the global South, and together retheorize how to accommodate diversity in complexly multilingual/ multicultural societies. Offering a framework anchored in transformative notions of democratic and reflexive citizenship, it prompts readers to critically rethink how existing contemporary frameworks such as Linguistic Human Rights rest on disempowering forms of multilingualism that channel discourses of diversity into specific predetermined cultural and linguistic identities.

Problems of Population Mapping in Developing Countries Springer Nature

An introduction to Sri Lanka's geography, people, early history, foreign rule, independence, and modern history is followed by a dictionary covering the people, places, and events that have shaped the country. Includes a detailed chronology, statistical tables, graphs, appendices, and a detailed bibliography. Annotation copyrighted by Book News, Inc., Portland, OR

Population Atlas of Sri Lanka, 2012

Nordic Academic Press

South Asia has developed from a group of newly independent post-Colonial states of at most secondary importance to the wider world to its current position as a region of central strategic importance to both global economic development and world peace and stability. This Atlas highlights the global significance of South Asia in relation to

economic, geopolitical and strategic interests. It provides a coherent descriptive and analytical account of the key elements of the complex societies that make up the region and its component countries. Illustrated with more than 100 original maps and offering concise entries on key issues, the book is structured thematically in these sections: Global Context Geographical Environments Historical Evolution of South Asia Key Issues in modern South Asia Economy and Security Designed for use in teaching undergraduate and graduate classes and seminars in geography, history, economics, anthropology, international relations, political science and the environment as well as regional courses on the South Asia, this book is also a comprehensive reference source for libraries and decision makers focusing on South Asia.

Routledge

This book is based on empirical research in Sri Lanka conducted after the catastrophic tsunami which hit the country in December 2004. The aims of the research have been to develop new knowledge on post-crisis reconstruction and recovery work, on how to bridge the knowledge gap between researchers and practitioners, as well as trying to use past research experiences from Sri Lanka to learn about the present day situation. The chapters use a common analytical frame related to the 'policy narratives' of post-tsunami recovery in the shadow of war, and deal with housing reconstruction, livelihoods, internally displaced, humanitarian interventions and protracted conflicts. The authors represent various social scientific fields and they have experience from different geographical areas of Sri Lanka. This book was

published as a special issue of Norsk Geografisk Tidsskrift.

Longman School Atlas (Revised Edition)
CRC Press

Provides statistics and political and physiographic maps for the world, each continent, and the United States, with political maps, flags, and statistics for each country, Canadian province, and state of the United States.

The Road to Federalism in Nepal, Myanmar and Sri Lanka Routledge

Sri Lanka is a country with vast spatial and seasonal variations of water supply and demand. Statistics in the form of aggregated information at national level sometimes mask issues of local water scarcity. But when the same indicators are used at subunit level, a substantial area of the country comes under severe water-scarce conditions. Knowledge of subunit level water scarcities is very important because most of the food requirement of the country at present comes from water-scarce regions and projected additional requirements are also to be met by the same regions.

Mental Health Atlas 2005 World Bank Publications

The first of a series designed to cover all tropical rain forests in the world. This is a visual portfolio of detailed maps of Asia, accompanied by a text which seeks to analyze the extent and causes of deforestation and to point a way towards sustainable forest development.

Spatial and Temporal Analyses MDPI

Secessionist movements are a fact of life and sometimes the interplay of demands becomes mutually exclusive and result in outbreaks of violence or indeed outright warfare. The contributors to this book provide a comparative survey of recent attempts at secession from across Europe and Asia and assesses the responses of the respective host

governments. This volume will be an invaluable resource for those who wish to understand the dynamics of secessionist movements and as such will appeal to students and scholars of Asian and...

Everything You Need to Know About Our Planet Today Routledge

This atlas for ICSE schools provides geographical, historical and environmental information. It provides up-to-date information about man's habitat, society and economy through maps, charts, pictures and tables. It shows in considerable details the land and people of the world, the availability of natural resources and the infrastructure developed for utilization of these resources. There is special focus on Indian history from ancient to modern times.

Sri Lanka Economic Atlas, 1980

Scarecrow Press

This book focuses on the representation of dermatological diseases in pigmented skin, fills an important gap in the literature, and facilitates better dermatological diagnosis when dealing with patients of various ethnicities. It discusses over 400 diseases and their representations with the help of over 2000 high-quality images and illustrations. This book elaborates on each single disease using easy-to-follow schematics and a focused approach to facilitate reader learning. Pursuing a comprehensive, the book covers not only common skin diseases such as psoriasis, lichen planus, eczema, erythrasma, cutaneous tuberculosis, leprosy, leishmaniasis and oral submucous fibrosis, but also rare tropical diseases such as sporotrichosis, mycetoma, rhinosporidiosis, lobomycosis, mucormycosis and subcutaneous zygomycosis. It also addresses aesthetic

concerns by covering hypopigmented and hyperpigmented disorders in pigmented skin such as guttate hypomelanosis, vitiligo, progressive macular hypomelanosis, chemical or physical induced depigmentation, melasma, sebo-melanosis, lichen and macular amyloidosis. Offering comprehensive coverage of dermatological disorders and diseases in pigmented skin, the book is a must-have resource for dermatology trainees and practitioners who treat or care for pigmented skin patients.

Population Atlas of Sri Lanka 2012
Routledge

Before the first appearance of the Atlas of the World's Languages in 1993, all the world's languages had never been accurately and completely mapped. The Atlas depicts the location of every known living language, including languages on the point of extinction. This fully revised edition of the Atlas offers: up-to-date research, some from fieldwork in early 2006 a general linguistic history of each section an overview of the genetic relations of the languages in each section statistical and sociolinguistic information a large number of new or completely updated maps further reading and a bibliography for each section a cross-referenced language index of over 6,000 languages. Presenting contributions from international scholars, covering over 6,000 languages and containing over 150 full-colour maps, the Atlas of the World's Languages is the definitive reference resource for every linguistic and reference library.

Historical Dictionary of Sri Lanka
Routledge

These case studies complement the earlier groundbreaking work of Natural Disaster Hotspots: A Global Risk Analysis

published in April 2005. Three case studies address specific hazards: landslides, storm surges and drought. An additional, three case studies address regional multi-hazard situations in Sri Lanka, the Tana River basin in Kenya, and the city of Caracas, Venezuela.

Meeting the Challenge of Practical Implementation World Health Organization

This is the first English-language atlas to systematically introduce the environment, hazard, vulnerability and risk mapping for 11 natural disasters, i.e. earthquake, volcano, landslide, flood, storm surge, sand-dust storm, tropical cyclone, heat wave, cold wave, drought and wildfire, and risk mapping for multi-hazard disaster in the world. The above 11 hazards are assessed and mapped at grid unit, comparable-geographic unit and national unit, and the multi-hazard is assessed and mapped at grid unit and national unit. The expected annual mortality and/or affected population risks and expected annual economic loss and/or affected property risk of 11 hazards and multi-hazard of the world at national level are unprecedentedly derived and ranked. The atlas can be a good reference for researchers and students in the field of natural disaster risk management and risk governance, and enterpriser and risk manager as well to understand the global natural disaster risk. Prof. Peijun Shi works at Beijing Normal University, China; Prof. Roger Kasperson works at Clark University, USA.

The Conservation Atlas of Tropical Forests Natural Resources Energy & Science Authority of Sri Lanka
Climate change and land use transformations have induced an increased flood risk worldwide. These phenomena are dramatically impacting

ordinary life and the economy. Research and technology offer a new strategy to quantify and predict such phenomena and also mitigate the impact of flooding. In particular, the growing computational power is offering new strategies for a more detailed description of the flooding over large scales. This book offers an overview of the most recent outcomes of the research on this argument.

Wind Energy for Power Generation

Springer Nature

Nations built on exclusion and assimilation, decades of civil war, widespread poverty, authoritarianism and the decline of democracy. Nepal, Myanmar and Sri Lanka are travelling a road to federalism. Institutions and ethnic identity have interacted to

privilege some and marginalise others. But when the right conditions prevail, political equality can be restored. This book charts the origins and evolution of federalism and other approaches to the accommodation of minority ethnic groups in Nepal, Myanmar and Sri Lanka. It applies a historical institutionalism methodology to understand why federalism has been resisted, what causes it to be established and what design options are most likely to balance otherwise competing centripetal and centrifugal forces. Breen shows how Nepal, Myanmar and Sri Lanka are finding a middle ground whereby deliberative and moderating institutions are combined with accommodating ones to support a political equality among groups and individuals.
