The A-904 and A-727, debuting in 1960 and 1962, respectively, are 3-speed automatic Chrysler TorqueFlite Transmissions. In Mopar circles, they have become synonymous with strength, durability, and performance. In fact, 43 years after its first application, A-904s were still found in the Jeep lineup! TorqueFlites are known for their

dependability, but many have endured a tremendous amount of abuse over 50-plus years when hooked up to V-8 Mopar powerplants. There is little doubt that some of these automatics could be prone to failure, or at least need a thorough rebuild. Tom Hand shares his decades of experience rebuilding TorqueFlite transmissions with chapters dedicated to troubleshooting, disassembly and reassembly, performance modifications, post-installation procedures, and the most thorough source guide offered in print, ever. The author walks you through the TorqueFlite rebuild with color photos showcasing step-by-step procedures with highly detailed, easy-to-follow text. This book will keep money in your pocket and add experience to your

résumé, but more important, it will help you get your Mopar back on the road!

This book explains how to choose the ideal heads, cams, intake, and carb for a complete top-end performance package. In addition, the author discusses and explains the building of a stroker engine. When going fast, you must be able to stop, so substantial brake upgrades are a necessity. All the stock disc upgrades and aftermarket offerings are included, including Baer and Wilwood systems. Author Andrew Finkbeiner explains how to fabricate, as well as install, subframe connectors and upgrade K-frame members. A number of weight-saving techniques that vastly improve handling and performance are revealed. Finkbeiner also goes into detail on how to select proper performance

components, upgraded steering boxes, overdrive transmissions, clutch, exhaust, electrical system upgrades, and so much more.
