Glencoe Math, Course 3, Student Edition, Volume 2 McGraw-Hill

Humanities, Social Sciences & World Languages

We are pleased to present this Global Edition, which has been developed specifically to acquaint students of business with the fundamental tools of managerial accounting and to promote their understanding of the dramatic ways in which business is changing. The emphasis is on teaching students to use accounting information to best manage an organization. Each chapter is written around a realistic business or focus company that guides the reader through the topics of that chapter. There is significant coverage of contemporary topics such as activity-based costing, target costing, the value chain, customer profitability analysis, and throughput costing while also including traditional topics such as job-order costing, budgeting, and performance evaluation. Many of the real-world examples in the Management Accounting Practice boxes have been revised and updated to make them more current and several new examples have been added. This Global Edition has been adapted to meet the needs of courses outside the United States and does not align with the instructor and student resources available with the U.S. edition.

Communication Research: Asking Questions, Finding Answers covers basic research issues and processes, both quantitative and qualitative, appropriate for communication students with little or no previous research methods experience. The text's guiding principle is that methodological choices are made from one's research questions or hypotheses. This avoids the pitfall in which students learn one methodology or one methodological skill and then force that method to answer all types of questions. Instead of working with one methodology to answer all types of questions, students come away understanding a variety of methods and how to apply them appropriately. Instructors and students can now access their course content through the Connect digital learning platform by purchasing either standalone

Connect access or a bundle of print and Connect access. McGraw-Hill Connect® is a subscription-based learning service accessible online through your personal computer or tablet. Choose this option if your instructor will require Connect to be used in the course. Your subscription to Connect includes the following: SmartBook® - an adaptive digital version of the course textbook that personalizes your reading experience based on how well you are learning the content. Access to your instructor's homework assignments, quizzes, syllabus, notes, reminders, and other important files for the course. Progress dashboards that quickly show how you are performing on your assignments and tips for improvement. The option to purchase (for a small fee) a print version of the book. Reveal Math. Accelerated McGraw-Hill Education

This text covers basic research issues and both quantitative and qualitative approaches to communication research. The guiding principle of the text is that methodological choices arise from one's research questions and hypotheses; thus, the text

focuses first on the research process, and then discusses the methodological tools for understanding and conducting basic communication research projects. In the second edition, every chapter includes examples based on research from 2002 and thereafter, and revisions improve the balance of quantitative and qualitative research perspectives as well as of data collection and analytical procedures.

Questions and Answers' results-centered pedagogy ensures that the content of each chapter works toward the larger goal of making students active participants in their own life-learning. Critical thinking questions and calls to action prompt students to evaluate the content and connect it to their own experiences. Online video case studies follow real college students attempting to change their behavior and prompt readers to apply lessons from these experiences to their own behavior-change goals. A series of lab activities provide tracking tools and self-assessment forms that can be completed in print or online. The Fifth Edition features new research-based coverage of the use of digital technology, including new Tech Tips in every chapter that help students take advantage of apps and tech-based devices that will help them reach their fitness and wellness goals. Additionally, every chapter has been updated to reflect current scientific thinking, data, and statistics from such authoritative sources as the Centers for Disease Control and Prevention, the American Cancer Society, the American Heart Association, the U.S. Food and Drug Administration, and the U.S. Department of Agriculture. Instructors and students can now access their course content through the Connect digital learning platform by purchasing either standalone Connect access or a bundle of print and Connect access. Experience Spanish The McGraw Hill 36 Hour Six Sigma Course The third edition of *Vis-À-vis* continues the excitement of the innovative second edition with a fully integrated and revised multimedia package and updated cultural information presented in the "Correspondance" feature (chapter opening letter, postcard, or e-mail, which is answered in the mid-lesson "Correspondance" cultural spread) and in the new "Bienvenue dans le monde francophone" feature that recurs after every four chapters in the text. The overall goal of the revision remains the same as that of the second edition: to promote a balanced four-skills approach to learning French through a wide variety of listening, speaking, reading, and writing activities, while introducing students to the richness and diversity of the Francophone world.

Questions and Answers: A Guide to Fitness and Wellness with Connect Access Card McGraw-Hill Education

FitWell empowers students to become active participants in their own health through a first-of-its-kind student-centered approach. McGraw-Hill conducted extensive market research with over 4,000 students to gain insight into their studying and buying behavior. Students told us they wanted more portability with innovative visual appeal and content that is designed according

to the way they learn. Instructors we surveyed told us they wanted a way to engage their students without compromising on high quality content. Our findings concluded that students who actively participated in their own learning actually retained more information and were able to apply it more often to their every day lives. How could we build a program for students that would promote active learning while providing visual appeal, portability, and relevance? We are excited to introduce to you the first-of-its kind program for Fitness and Wellness. FitWell delivers the serious content you want in both a magazine-style format that's fun to read and an online learning space that commands active learning. We began by collecting over 1,000 Fitness and Wellness questions asked by real students. Questions like, "How can I improve my self-esteem?" or "Do I really need 8 glasses of water a day?" introduce each section of material throughout the program. With its series of assignable videos that debunk common health and fitness myths ("Sit Ups Make Your Stomach Flatter" or "Marijuana gives you munchies"), FitWell grabs hold of students' attention and doesn't let go. The real-life behavior change case study videos found online provide students with unmatched relevance. Students click, watch, and learn: these videos follow real college students attempting to change their behavior for an entire semester, and hopefully for life. With its online Fitness assessments, assignable interactive animations, and online labs, FitWell engages students like no other fitness and wellness program. The Right Conversations: To make our program relevant, we wanted to understand what students care about when it comes to their health and well-being. It turned out, when it comes to Fitness and Wellness, students had a lot of

questions! We compiled over 1,000 questions that students asked our authors. These real student questions like, "Can colds really come from stress?" or "What's the best exercise for me?" introduce each section of material, ensuring the content that follows is always research-based and relevant. Instead of passively reading, your students actively engage in questions, answers, and conversations that are of interest to them. The Right Instruction: Assign your students a series of short video clips throughout the semester that track the progress of real students making behavior changes in their lives. Follow Greg on his quest to begin exercising and watch him document his challenges on camera. Will he be able to make lasting, healthy choices? Your students will have to tune in and find out for themselves! Captivate your students by assigning "Myth/Fact" videos that explore common myths, like "Oily Foods Give You Acne", and separate the fact from fiction. Students actively work through the FitWell system online and in their magazine-style text, completing fitness assessments, interactive animations, and labs. Not only does this format produce measurable results that are documented online, but the focus on active learning is the first step towards inspiring more active students. The Right Time: The time is right for a flexible hybrid print-digital learning system that meets students online, where they already work, play, and live.
