*Great Themes of Science Fiction* Springer Nature

This study presents a unique collection of essays which focus on the relationships among form, aesthetics, and transnational women's writing produced in recent years. The essays in this volume treat literary works from diverse cultures and geographies, concentrating on the intersections of theory and literature. This results in a wide spectrum of identities and texts – including the work of Swedish poet Aase Berg, the Indian translation market, the Chicana novel, creative non-fiction by Croatian writer Dubravka Ugrešić, and multilingual hybrid texts by Theresa Hak Kyung Cha – in order to provide a framework for an overarching theory of transnationalism as it interacts with newer paradigms of gendered identity and the new forms of literature to which they contribute. Transnationalism and Resistance offers a multifaceted approach to transnational studies and constitutes a cogent analysis of the ways in which women's writing informs contemporary global literary Production. This volume is of interest for scholars in women's studies, literature, the social sciences, cultural studies and all other fields that take an interest in writing that addresses contemporary global issues.

The light greenery of the early summer is trembling around Erik and Julia as they shove their children into the car and start the drive towards the house by the sea on the west coast of Finland where they will spend the summer. From the outside they are a happy young family looking forward to a long holiday together. But look under the surface, and their happiness shows signs of not lasting the summer. On the eve of the holiday, Erik lost his job, but hasn't yet told the family. And the arrival of Julia's childhood friend Marika - along with her charismatic husband Chris, the leader of a group of environmental activists that have given up hope for planet Earth and are returning to a primitive lifestyle - deepens the hairline cracks that had so far remained invisible. Around these people, over the course of one summer, Philip Teir weaves a finely-tuned story about life choices and lies, about childhood and adulthood. How do we live if we know that the world is about to end?

Hachette UK

Over the last thirty years, more and more critics and scholars have come to recognize the significant influence of science on literature. This collection of essays focuses specifically on what poets in the twentieth and twenty-first centuries have made of modern scientific developments. In these twelve essays, leading experts on modern poetry, literature, and science explore how poets have used scientific language in their poems, how poetry can offer new perspectives on science, and how the two cultures can and have come together in the work of poets from Britain,

Ireland, America, and Australia.

*The Best American Science Fiction and Fantasy 2021* Greenwood Publishing Group

Science fiction explores the wonderful, baffling and wildly entertaining aspects of a universe unimaginably old and vast, and with a future even more immense. It reaches into that endless cosmos with the tools of rational investigation and storytelling. At the core of both science and science fiction is the engaged human mind--a consciousness that sees and feels and thinks and loves. But what is this mind, this aware and self-aware consciousness that seems unlike anything else we experience? What makes consciousness the Hard Problem of philosophy, still unsolved after millennia of probing? This book looks into the heart of this mystery - at the science and philosophy of consciousness and at many inspiring fictional examples - and finds strange, challenging answers. The book's content and entertaining style will appeal equally to science fiction enthusiasts and scholars, including cognitive and neuroscientists, as well as philosophers of mind. It is a refreshing romp through the science and science fiction of consciousness.

**Transnationalism and Resistance: Experience and Experiment in Women's Writing** Norwich : Norvik Press ; Chester Springs, Pa. : U.S. distributor, Dufour Editions

Written by the world's leading scholars and researchers in the emerging field of sound studies, *The Oxford Handbook of Sound Studies* offers new and fully engaging perspectives on the significance of sound in its material and cultural forms. The book considers sounds and music as experienced in such diverse settings as shop floors, laboratories, clinics, design studios, homes, and clubs, across an impressively broad range of historical periods and national and cultural contexts. Science has traditionally been understood as a visual matter, a study which has historically been undertaken with optical technologies such as slides, graphs, and telescopes. This book questions that notion powerfully by showing how listening has contributed to scientific practice. Sounds have always been a part of human experience, shaping and transforming the world in which we live in ways that often go unnoticed. Sounds and music, the authors argue, are embedded in the fabric of everyday life, art, commerce, and politics in ways which impact our perception of the world. Through an extraordinarily diverse set of case studies, authors illustrate how sounds -- from the sounds of industrialization, to the sounds of automobiles, to sounds in underwater music and hip-hop, to the sounds of nanotechnology -- give rise to new forms listening practices. In addition, the book discusses the rise of new public problems such as noise pollution, hearing loss, and the "end" of the amateur musician that stem from the spread and appropriation of new sound- and music-related technologies, analog and digital, in many domains of life. Rich in vivid and detailed examples and compelling case studies, and featuring a companion website of listening samples, this remarkable volume boldly challenges readers to rethink the way they hear and understand the world.

### **On Language, Race, Sex, Science Fiction, and Some Comics** OUP USA

The Oxford Handbook of Global Modernisms expands the scope of modernism beyond its traditional focus on English and Irish literature to explore the contributions of artists from countries and regions like the US, Cuba, Spain, the Balkans, China, Japan, India, Vietnam, and Nigeria.

#### New Directions Mariner Books

The best science fiction and fantasy stories of 2021, selected by series editor John Joseph Adams and guest editor Veronica Roth. This year's selection of science fiction and fantasy stories, chosen by series editor John Joseph Adams and bestselling author of the *Divergent* series Veronica Roth, showcases a crop of authors that are willing to experiment and tantalize readers with new takes on classic themes and by exchanging the ordinary for the avant-garde. Folktales and lore come alive, the dead rise, the depths of space are traversed, and magic threads itself through singular moments of love and loss, illuminating the circulatory nature of life, death, the in-between, and the hereafter. The Best American Science Fiction and Fantasy 2021 captures the all-too-real cataclysm of human nature, claiming its place in the series with compelling prose, lyrical composition, and curiosity's never-ending pursuit of discovering the unknown.

#### Remainland Infobase Publishing

The papers collected in this volume deal with the explorations of Science Fiction, Fantasy and, more generally, the representation of otherness through the narrative construction of fantastic, imaginary, appalling or attractive places, stories and figures. Contributions are arranged in four main sections. The first section (Other spaces, new worlds) deals with Hindi and Arabic Science Fiction. The second section (Constructing forms of otherness) analyses the narrative and psychological mechanisms that give forms to a stereotype or archetypical image of the threatening Other. The third section ((Re)shaping style(s), language(s) and discourse(s) of otherness) is centred on the idea of language as a tool to build up styles, genres and texts, and literature as an escape from disappointing history and a cross-cultural wandering space of narrative ghosts. The fourth section (Circulating fearful otherness) tests the limits and heuristic potential of a philological approach in reconstructing the wide circulation of motifs and characters from antiquity to (post-)modernity.

#### **Scotland as Science Fiction** Palgrave Macmillan

A user-friendly reference for English-language readers who are eager to explore contemporary fiction from around the world. Profiling hundreds of titles and authors from 1945 to today, with an emphasis on fiction published in the past two decades, this guide introduces the styles, trends, and genres of the world's literatures, from Scandinavian crime thrillers and cutting-edge Chinese works to Latin American narco-fiction and award-winning French novels. The book's critical selection of titles defines the arc of a country's literary development. Entries illuminate the fiction of individual nations, cultures, and peoples, while concise biographies sketch the careers of noteworthy authors. Compiled by M. A. Orthofer, an avid book reviewer and the founder of the literary review site the Complete Review, this reference is perfect for readers who wish to expand their reading choices and knowledge of contemporary world fiction. "A bird's-eye view of titles and authors from everywhere—a book overfull with reminders of why we love to read international fiction. Keep it close by."—Robert Con Davis-Udiano, executive director, World Literature Today "M. A. Orthofer has done more to bring literature in translation to America than perhaps any other individual. [This book] will introduce more new worlds to you than any other book on the market."—Tyler Cowen, George Mason University "A relaxed, riverine guide through the main currents of international

writing, with sections for more than a hundred countries on six continents."—Karan Mahajan, Page-Turner blog, The New Yorker Waking the Moon University of Illinois Press

Great Themes of Science Fiction looks at the most important elements of the genre and shows how each has evolved over time. Among the topics examined are aliens and alien worlds, supermen and adapted men, immortality and paranormal powers, robots and computers, space civilizations and colonies, wars on earth and in space, worldwide disasters, time travel, and parallel worlds.

#### Columbia University Press

This reference defines the rapidly emerging interdisciplinary field of literature and science. An introductory essay traces the history of the field, its growing reputation, and the current state of research. Broad in scope, the volume covers world literature from its beginnings to the present day and illuminates the role of science in literature and literary studies. This volume includes over 650 A-Z entries on: topics and themes, significant writers and scientists, key works, and important theories and methodologies.

#### Nobel Prize in Literature, 1974 Poetry Book Society

Recommended Translation Harry Martinson (1904-78) sailed the oceans from 1920 to 1927 as an escape from an unhappy childhood in rural southwest Sweden. Returning to his native tracts, he devoted himself to writing and eventually became one of the best-known authors of his time, his books appealing widely both to academics and to the general reader. His election to the Swedish Academy in 1949 was seen as a gesture towards a generation of more or less self-educated working-class writers, and he shared the 1974 Nobel Prize in Literature with novelist Eyvind Johnson. Sections of the Swedish press responded with such vehemence to the way Academicians had rewarded two of their own that Martinson vowed never to publish again, and his last years were darkened by despair and depression as his view of the world became bleaker. His books reflect his upbringing, his travels and his interest in science and social questions. His poetry has many strands but the one most often admired is that which combines close scrutiny of the small events of the natural world with an intense awareness of cosmic distances in time and space. While his prose books have reached a wide readership in several languages, Martinson's poems have appeared only sporadically in English. Robin Fulton's translations provide the first substantial selection of Harry Martinson's poetry for English-language readers. His edition has an introductory essay by Staffan Söderblom.

This reference tracks the development of speculative fiction influenced by the advancement of science and the idea of progress from the eighteenth century to the present day. The major authors and publications of the genre and significant subgenres are covered. Additionally there are entries on fields of science and technology which have been particularly prolific in provoking such speculation. The list of acronyms and abbreviations, the chronology covering the literature from the 1700s through the present, the introductory essay, and the dictionary entries provide science fiction novices and enthusiasts as well as serious writers and critics with a wonderful foundation

for understanding the realm of science fiction literature. The extensive bibliography that includes books, journals, fanzines, and websites demonstrates that science fiction literature commands a massive following.

*Aspects of Modern Swedish Literature* Edward Elgar Publishing  
Scots like Iain N. Banks and Ken MacLeod lead in a futuristic tradition, for from MacDonald, Barrie, and Stevenson onwards, Scots have been speculating in ways derived from their unique circumstances lacking political power, they imagine future spaces and different places and<sup>151</sup>;with a twist. Nineteenth-century thermodynamics (theorized in Scotland), Celtic Otherworlds, and a Scotland always on the other side of history open unusual futures for Mitchison, Spark, Lindsay, Mitchell, MacDiarmid, Morgan, Crumey, Fitt, and Gray.
