We are at crossroads in deep learning. Today, deep learning

developers typically utilize one of the top two machine learning frameworks: Tensorflow, developed by Google/Deepmind, and PyTorch, developed by Facebook. In industry, Tensorflow is still more widely adopted. Still, PyTorch is rapidly up-and-coming in the research community, where 70%-80% of recently submitted conference research papers utilize PyTorch instead of Tensorflow. A recent 2020 Stack Overflow survey of the most popular frameworks and libraries reported that PyTorch was selected by an est 30% of respondents vs. 70% for Tensorflow, with PyTorch nearly doubling in popularity over the last two years. In the next couple of years, as these machine learning frameworks become equal in popularity, a book must well verse developers in both so they can choose the right methodology to help solve their deep learning problems. The problem is that most deep learning books published today focus on just one of the machine learning frameworks. Python Deep Learning would identify both frameworks' pros and cons and then teach deep learning concepts utilizing practical examples from the framework best suited for particular problems. This book also features the APIs and libraries integrated with the respective framework, Keras for Tensorflow and fastai for PyTorch, that make application development and deployment even more straightforward. What this Books Covers: Introduction and overview of deep learning concepts Description of the two machine learning frameworks: Tensorflow and PyTorch, as well as successful examples of their usage Detail the pros and cons of each machine learning framework Overview of the supportive libraries and APIs (including Keras and fastai) for each of the frameworks that make application development simpler Chapter-by-chapter review of the top neural network topologies (CNN, RNN, LSTM, MLP, and several newer variants) Interesting code examples of practical

applications of the different neural networks, not the same tired MNIST and other examples often utilized today Final series of code examples (in Tensorflow or PyTorch) of real-world deep learning solutions that utilize more exotic neural network topologies

Maryam Baouardy is a daughter of Galilee, from a very poor family. At the age of three, she lost her father and mother and was adopted by her uncle. She never learned how to read or write, but her life became a remarkable succession of supernatural manifestations, worthy of Catherine of Siena or Teresa of Avila, from the stigmata to singular battles against Satan. From where does she draw the heavenly wisdom, childlike yet strong, that made her loved by all? Where does this burning love that consumes her come from? For her, just as for St. Paul, "to live is Christ". This beautiful "Lily of Palestine" became Sr. Maryam of Jesus Crucified in the Carmelite Order. Both humble guardian of the grille and formidable forewoman, she was often visited by Jesus and Mary. The words she transmits from them, pearls of great price, are significant for us today as they enlighten the future of our broken world. Maryam died in Bethlehem in her 33rd year, on August 26, 1878, shortly after the birth of Thérèse of Lisieux in France. Pope John Paul II beatified her on November 13, 1983. It is impossible to know Maryam without falling in love with her, without yearning for holiness, at her school.

All the aspects of porting stock as well as aftermarket heads in aluminum and cast-iron constructions are covered. Vizard goes into great depth and detail on porting aftermarket heads. Fresh betrayal leads to consequences no one saw coming in this book from New York Times bestselling author Kimberla Lawson Roby. It's been four years since twenty-eight-year old Alicia Black, daughter of Reverend Curtis Black, divorced her second husband, the most womanizing and corrupt man she has ever known. Since then, Alicia has been dating her first husband, Phillip Sullivan, a wonderfully kind and true man of God whom she'd hurt terribly by cheating on him. Alicia has worked hard to prove herself worthy of his trust once more, and when he asks her to marry him again, she couldn't be happier. But Levi Cunningham, the drug dealer Alicia had an extramarital affair with, has just been released from prison, and he has completely turned his life around for the better. Still head-over-heels in love with Alicia, he will do whatever is necessary to win her back. Remarrying Phillip is the one thing Alicia has wanted for years, but she can't get Levi out of her mind. Alicia and Phillip aren't the only ones in the middle of a crisis. Their best friends, husband and wife Brad and Melanie Richardson, are struggling to keep their marriage together. Workaholic Brad is never home and has begun losing thousands on bad investments. Or so he says. Melanie, who is certain there's more to the story, is determined to get at the truth. At the same time, her frustration and stress cause her to eat a lot less, and she behaves in an extreme fashion. Alicia worries that she could be suffering from anorexia, but Melanie steadfastly denies it. Their friendship begins to suffer, and it isn't long before they're talking to each other like enemies.
