Emergency Medical Services (EMS) agencies regardless of service delivery model have sought guidance on how to better integrate their emergency preparedness and response activities into similar processes occurring at the local, regional, State, tribal, and Federal levels. This primary purpose of this project is to begin the process of providing that guidance as it relates to mass care incident deployment.

Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

In the past decade, few subjects at the intersection of medicine and sports have generated as much public interest as sports-related concussions - especially among youth. Despite growing awareness of sports-related concussions and campaigns to educate athletes, coaches, physicians, and parents of young athletes about concussion recognition and management, confusion and controversy persist in many areas. Currently, diagnosis is based primarily on the symptoms reported by the individual rather than on objective diagnostic markers, and there is little empirical evidence for the optimal degree and duration of physical rest needed to promote recovery or the best timing and approach for returning to full physical activity. Sports-Related Concussions in Youth: Improving the Science, Changing the Culture reviews the science of sports-related concussions in youth from elementary school through young adulthood, as well as in military personnel and their dependents. This report recommends actions that can be taken by a range of audiences - including research funding agencies, legislatures, state and school superintendents and athletic directors, military organizations, and equipment manufacturers, as well as youth who participate in sports and their parents - to improve what is known about concussions and to reduce their occurrence. Sports-Related Concussions in Youth finds that while some studies provide useful information, much remains unknown about the extent of concussions in youth; how to diagnose, manage, and prevent concussions; and the short- and long-term consequences of concussions as well as repetitive head impacts that do not result in concussion symptoms. The culture of sports negatively influences athletes' self-reporting of concussion symptoms and their adherence to return-to-play guidance. Athletes, their teammates, and, in some cases, coaches and parents may not fully appreciate the health threats posed by concussions. Similarly, military recruits are immersed in a culture that includes devotion to duty and service before self, and the critical nature of concussions may often go unheeded. According to Sports-Related Concussions in Youth, if the youth sports community can adopt the belief that concussions are serious injuries and emphasize care for players with concussions until they are fully recovered, then the culture in which these athletes perform and compete will become much safer. Improving understanding of the extent, causes, effects, and prevention of sports-related concussions is vitally important for the health and well-being of youth athletes. The findings and recommendations in this report set a direction for research to reach this goal.

The founder of Four Seasons Hotels shares the philosophy and values that have made his legendary brand How did a child of immigrants, starting with no background in the hotel business, create the world's most admired and successful hotel chain? And how has Four Seasons grown dramatically, over nearly a half century, without losing its focus on exceptional quality and unparalleled service? Isadore Sharp answers these questions in his engaging memoir, which doubles as a powerful guide

for leaders in any field. He recalls the surprising history of his company, starting with its roots in his father's small construction business, which Sharp joined after getting a degree in architecture. Shifting into hotels wasn't easy, and he learned by trial and error. His breakthrough was a vision for a new kind of hotel, featuring superior design, top-quality amenities, and, above all, a deep commitment to service. Sharp realized that customers would gladly pay extra for a "home away from home" experience. But that would be possible only if everyone-from managers and supervisors to bellmen, servers, and housekeepers-was fully engaged. The front-line staff, who have the most contact with guests, can make or break a five-star reputation. Readers will be fascinated to learn how Four Seasons does it, year after year, in more than thirty countries around the world.

In one of his most ambitious physical efforts to date, Dean Karnazes attempted to run 50 marathons, in 50 states, in 50 days to raise awareness of youth obesity and urge Americans of all fitness levels to "take that next step." "UltraMarathon Man: 50 Marathons - 50 States - 50 Days", a Journeyfilm documentary, follows Dean's incredible step-by-step journey across the country. Ultrarunning legend Dean Karnazes has run 262 miles-the equivalent of ten marathons-without rest. He has run over mountains, across Death Valley, and to the South Pole-and is probably the first person to eat an entire pizza while running. With an insight, candor, and humor rarely seen in sports memoirs (and written without the aid of a ghostwriter or cowriter), Ultramarathon Man has inspired tens of thousands of people-nonrunners and runners alike-to push themselves beyond their comfort zones and be reminded of "what it feels like to be truly alive," says Sam Fussell, author of Muscle. Ultramarathon Man answers the questions Karnazes is continually asked: - Why do you do it? - How do you do it? - Are you insane? And in the new paperback edition, Karnazes answers the two questions he was most asked on his book tour: - What, exactly, do you eat? - How do you train to stay in such good shape?

In Pass the Butterworms Cahill takes us to the steppes of Mongolia, where he spends weeks on horseback alongside the descendants of Genghis Khan and masters the "Mongolian death trot"; to the North Pole, where he goes for a pleasure dip in 36-degree water; to Irian Jaya New Guinea, where he spends a companionable evening with members of one of the last head-hunting tribes. Whether observing family values among the Stone Age Dani people, or sampling delicacies like sautéed sago beetle and pre-masticated manioc beer, Cahill is a fount of arcane information and a master of self-deprecating humor.

In Mile Markers, Runner's World contributing editor Kristin Armstrong captures the ineffable and timeless beauty of running, the importance of nurturing relationships with those we love, and the significance of reflecting on our experiences. This collection considers the most important reasons women run, celebrating the inspiring passion runners have for their sport and illustrating how running fosters a vitally powerful community. With unique wit, refreshing candor, and disarming vulnerability, Armstrong shares her conviction that running is the perfect parallel for marking the milestones of life. From describing running a hardfought race with her tightly-knit group of sweat sisters, to watching her children participate in the sport for the very first time, Armstrong infuses her experiences with a perspective of hope that every moment is a chance to become a stronger, wiser, more peaceful woman. Running threads these touching stories together, and through each of them we are shown the universal undercurrents of inspiration, growth, grace, family, empowerment, and endurance.

#1 NATIONAL BESTSELLER Terry Fox defined perseverance and hope for a generation of Canadians. Forty years after Terry's run ended, Forever Terry reflects what Terry's legacy means to us now, and in the future. To mark the 40th anniversary of the Marathon of Hope, Forever Terry: A Legacy in Letters recounts the inspiration, dedication, and perseverance that Terry Fox embodied, and gives voice to an icon whose example spoke much louder than his words. Comprising 40 letters from 40 contributors, and edited by Terry's younger brother Darrell on behalf of the Fox family, Forever Terry pays tribute to Terry's legacy, as seen through the eyes of celebrated Canadians ranging from Margaret Atwood, Bobby Orr, Perdita Felicien, Jann Arden, and Christine Sinclair, to those who accompanied Terry on his run, Terry Fox Run organizers, participants, supporters, and cancer champions. Appearing alongside never-before-seen photos of their hero, their reflections reveal connections that readers would never have expected, and offer a glimpse into the way goodness and greatness inspire more of the same. Forever Terry is a testament to the influence one brave man has had on the shape of Canadian dreams, ambitions, and commitment to helping others. Author proceeds support the Terry Fox Foundation, which has raised over \$800 million for cancer research. Contributors include Hayley Wickenheiser, Tom Cochrane, Darryl Sittler, Shawn Ashmore, Doug Alward, Nadine Caron, Douglas Coupland, Rick Hansen, Sidney Crosby, Akshay Grover, Lloyd

Robertson, Bret Hart, Leslie Scrivener, Isadore Sharp, Wayne Gretzky, Jim Pattison, Catriona Le May Doan, Malindi Elmore, Michael Bubl , Silken Laumann, Steve Nash, Karl Subban, and Marissa Papaconstantinou, among many others.
