Borders sit at the center of global politics. Yet they are too often understood as thin lines, as they appear on maps, rather than as political institutions in their own right. This book takes a detailed look at the evolution of border security in the United States after 9/11. Far from the walls and fences that dominate the news, it reveals borders to be thick, multi-faceted and binational institutions that have evolved greatly in recent decades. The book contributes to debates within political science on sovereignty, citizenship, cosmopolitanism, human rights and global justice. In particular, the new politics of borders reveal a sovereignty that is not waning, but changing, expanding beyond the state carapace and engaging certain logics of empire.

Emphasizing patient safety and infection prevention in the dental office, *Infection Control and Management of Hazardous Materials for the Dental Team*, 5th Edition, covers everything from basic concepts in microbiology to protocols for clinical asepsis. Clear, step-by-step instructions make it easy for you to perform safety procedures and use the supplies and equipment needed to prevent the spread of infectious disease. New to this edition are full-color photographs and four new chapters on emerging topics. Written by oral biology and infection control expert Chris Miller, this resource is a must read for every member of the dental team. Comprehensive coverage follows dental assisting and dental hygiene curricula requirements for infection control, ensuring that you learn essential principles and procedures for clinical competence. Easy-to-follow, step-by-step procedures are provided

for skills that dental team members must master, each presented with a goal, materials, chronological steps, and rationales for the performance of each step. Key terms begin each chapter and are highlighted within text discussions and defined in a back-of-book glossary. Summary tables and boxes make study easier by highlighting key concepts and procedures. Review questions ensure your comprehension of the material with 5 to 20 multiple-choice questions at the end of each chapter. Practical appendices offer easy access to the most significant regulatory agency rules and recommendations for infection control. Student resources on the Evolve companion website include practice exercises plus review questions and quizzes. NEW! Full-color photographs show the latest equipment, supplies, and procedures and accurately depict concepts in microbiology and the nature of infectious disease. Four NEW chapters cover changing and emerging topics and trends in infection control, including Hand Hygiene, Preventing Sharps Injuries, General Office Asepsis, and Cross-contamination Between Work and Home. NEW! Case scenarios on the Evolve companion website examine an infection control incident along with its potential consequences, possible preventive measures, and related recommendations and regulations. UPDATED content includes new areas such as technology involving surface and equipment asepsis, dental water unit air quality, and green infection control.

This market-leading text supports the beginning learner by describing the knowledge and skills required to work towards a Certificate III in Health Services Assistance (Assisting in Nursing Work in Acute Care). Each chapter identifies the scope of practice and range of activities that can be undertaken when working in an Acute Care setting. The skills and knowledge required for the

effective delivery of care, with examples, are detailed throughout the text, with the capacity for the learner to self-assess and to use knowledge learnt through the 'Apply your knowledge' feature at the end of each chapter. Health Services Assistance is the only comprehensive, local standalone text that directly aligns to the qualification HLT33115. Additional NEW units in this third edition extend the core to align with the Certificate III Allied Health Assistant requirement, for a mixed cohort. Using this text enables students to meet high standards of patient-focused care and provides teachers and facilitators with tools to support students throughout their learning journey. During the past decade, rapid developments in information and communications technology have transformed key social, commercial and political realities. Within that same time period, working at something less than internet speed, much of the academic and policy debates arising from these new and emerging technologies have been fragmented. There have been few examples of interdisciplinary dialogue about the potential for anonymity and privacy in a networked society. Lessons from the Identity Trail fills that gap, and examines key questions about anonymity, privacy and identity in an environment that increasingly automates the collection of personal information and uses surveillance to reduce corporate and security risks. This project has been informed by the results of a multi-million dollar research project that has brought together a distinguished array of philosophers, ethicists, feminists, cognitive scientists, lawyers, cryptographers, engineers, policy analysts, government policy makers and privacy experts. Working collaboratively over a four-year period and participating in an iterative process designed to maximize the potential for interdisciplinary discussion and feedback through a series of workshops and peer review, the authors have integrated crucial public policy themes with the most recent research outcomes.

CAN (Controller Area Network) is a serial communication protocol that was originally developed for the automobile industry. CAN is far superior to conventional serial technologies such as RS232 in regards to functionality and reliability and yet CAN implementations are more cost effective. CANopen, a higher layer protocol based on CAN, provides the means to apply the ingenious CAN features to a variety of industrial-strength applications. Many users, for example in the field of medical engineering, opted for CANopen because they have to meet particularly stringent safety requirements. Similar requirements had to be considered by manufacturers of other equipment with very high safety or reliability requirements (e.g. robots, lifts and transportation systems). Providing a detailed look at both CAN and CANopen, this book examines those technologies in the context of embedded networks. There is an overview of general embedded networking and an introduction to the primary functionality provided by CANopen. Everything one needs to know to configure and operate a CANopen network using off-the-shelf components is described, along with details for those designers who want to build their own CANopen nodes. The wide variety of applications for CAN and CANopen is discussed, and instructions in developing embedded networks based on the protocol are included. In addition, references and examples using MicroCANopen, PCANopen Magic, and Vector's high-end development tools are provided.

In 2016, the world looked on as thousands set up camp within Standing Rock Sioux Reservation to protest the re-routing of the Dakota Access oil pipeline close to the Reservation's northern border. People from many Native American tribes were joined by non-tribal environmentalists, including US army veterans, all of them standing in solidarity with the Lakota. Then, in early 2017, the protest was disbanded using brutal force. And that is when the real struggle began. From the decline of the East coast tribes to the dispossession of the native people along the Missouri basin, from the Battle of Little Bighorn to Wounded Knee, America's indigenous peoples have been subject to horrendous persecution, land grabs and the steady erosion of their way of life. Frontline journalist Ekberzade Bikem recounts the epic story of this centuries' old struggle as told to her by the guardians of the oral history of the Great Plains, the grandson of chief Sitting Bull's nephew and many of the other activists pledged to continue the fight in the aftermath of Standing Rock.

Achieve high standards in patient-focused care. Health Services Assistance provides complete coverage of core and elective units for assisting in nursing work in acute care. Exercises throughout the text provide students with the means to self-assess and extend their skills and knowledge. Foundation skills are developed early, underpinning understanding of the specialist acute care chapters that follow. Students are encouraged to reflect and contextualise their learning and to practise techniques in small

groups. Activities break up the material so information is easier to retain. Self-check, extension activities and discussion questions can be incorporated into an institution's assessment strategy. Health Services Assistance is structured by competency for HLT33115 Certificate III in Health Services Assistance, supporting nursing in acute care, and is packed with specific cases and examples, as well as including additional content on palliative care and mental health. Each chapter addresses a competency, with a volume of learning that underpins the assessment requirements. The book is structured so that elements and criteria are communicated by the section headings. Teach following the qualification structure, using the print book, eBook or LMS integration.

The beginning of the millennium has been influenced by a visible acceleration of the globalisation process. A complex and dynamic phenomenon, it has generated a series of consequences at the political, strategic and military levels, as well as the cultural level. The increase of interdependence between actors on the international stage, modern technologies, means of communication, cross-border relations, and the constant flux of goods, capital, services and people entail major changes for the tools used by states in international relations. In this context, states are obligated to identify solutions to overcome risks and threats posed to peace and security, as current regional conflicts can easily become international. In order to streamline communication and interstate cooperation, beyond the classic appeal to tolerance, there has been, in recent years, an exponential increase of the use of culture and, by extension, cultural diplomacy. Thus, cultural cooperation represents a vital part of the current process of transformation and transition.

Adopting an interdisciplinary character, this volume investigates some of the aspects that emphasise the essential role of culture, as a promoter and supporter of peace and security, as an agent of regional and national development, as well as its contributions to attracting and retaining human and financial capital, regional branding, and improving quality of life, among others. The volume will particularly appeal to professors and students of political science, international relations, history, economy, law, and sociology, as well as intellectuals interested in the catalysing role

of culture in all areas of activity.

The Third International Conference on Network Security and Applications (CNSA-2010) focused on all technical and practical aspects of security and its applications for wired and wireless networks. The goal of this conference is to bring together researchers and practitioners from academia and industry to focus on understanding modern security threats and countermeasures, and establishing new collaborations in these areas. Authors are invited to contribute to the conference by submitting articles that illustrate research results, projects, survey work and industrial experiences describing significant advances in the areas of security and its applications, including: • Network and Wireless Network Security • Mobile, Ad Hoc and Sensor Network Security • Peer-to-Peer Network Security • Database and System Security • Intrusion Detection and Prevention • Internet Security, and Applications Security and Network Management • E-mail Security, Spam, Phishing, E-mail Fraud • Virus, Worms, Trojans Protection • Security Threats and Countermeasures (DDoS, MiM, Session Hijacking, Replay attack etc. ) • Ubiquitous Computing Security • Web 2.0 Security • Cryptographic Protocols • Performance Evaluations of Protocols and Security Application There were 182 submissions to the conference and the Program Committee selected 63 papers for publication. The book is organized as a collection of papers from the First International Workshop on Trust Management in P2P Systems (IWTMP2PS 2010), the First International Workshop on Database Management Systems (DMS- 2010), and the First International Workshop on Mobile, Wireless and Networks Security (MWNS-2010).

Important aspects of the history of language in the United States remain shrouded in myth and legend. The notion of "one nation, one language" is part of the idealized history of the United States, although in its short history it has probably been host to more bilingual people than any other country in the world. Language is more than a means of communication. It brings into play an entire range of experiences and attitudes toward life. Furthermore, language is a potent symbolic issue because it links power and

political claims of ownership with psychological demands for group worth. How people belonging to different language and cultural communities live together in the same political community and how political and structural tensions arise to divide them along language lines, are questions addressed in *The Politics of Language*. This book analyzes the historical background and recent controversy over language in the United States and compares it to two official multilingual societies: Canada and Switzerland. Its accessibility as a survey of this topic makes it

ideal for courses in linguistics, political science, and sociology.

While many works have been published on different aspects of the Holocaust and genocides, their aftermath and impact on society still require further research and discussion in scholarly literature. This book illuminates unknown aspects of the aftermath of the Holocaust and genocides, and discusses trials of Holocaust and genocide perpetrators, commemoration of the

victims, attempts to revive Jewish national life, and outbreaks of post-World War II anti-Semitism. It also analyzes the representation of the Holocaust and genocides in literature, press and film. The volume includes thirteen articles, which are based on recently discovered archival materials, and provides new approaches to the research of the Armenian genocide, the Holodomor, ethnic cleansing and the Holocaust.
