The series *Advances in Stem Cell Biology* is a timely and expansive collection of comprehensive information and new discoveries in the field of stem cell biology. iPSCs in Tissue Engineering, Volume 11 addresses how induced pluripotent stem cells (iPSCs) are being used to advance tissue engineering. Somatic cells can be reprogrammed into iPSCs by the expression of specific transcription factors. These cells have been transforming biomedical research over the last 15 years. This book will address the advances in research of how iPSCs are being used for the generation of different tissues and organs such as the lungs, trachea, salivary glands, skeletal muscle, liver, intestine, kidney, even the brain, and much more. This volume is written for researchers and scientists interested in stem cell therapy, cell biology, regenerative medicine, and tissue engineering and is contributed by world-renowned authors in the field. Provides overview of the fast-moving field of stem cell biology and function, regenerative medicine, and therapeutics. Covers the engineering of the following organs: lungs, trachea, salivary glands, skeletal muscle, liver, intestine, kidney, even the brain, and more. Is contributed from stem cell leaders around the world.

This book has been prepared keeping in mind rapid changes taking place in the land-locked economy of Nepal seated in the lap of Great Himalaya where tourism is expected to contribute in a big way. Salient Features - Analyzes economic impact of tourism growth on various aspects of the Nepalese economy. - Explores the role of tourism on globalization of this backward economy. - Attempts to incorporate important studies undertaken in this context. - Incorporates opinions of leading experts on tourism promotion and economic development exclusively for this book. - Thoroughly reviews contours of changes in tourism policy. - Well documented in terms of source of tourism information, institutions and chronological highlights, etc. In view of the above, this piece of work would be of immense use to policy makers, planners, researchers, practioners and also to students for whom sufficient materials have been added.

American English File Second Edition retains the popular methodology developed by world-renowned authors Christina Latham-Koenig and Clive Oxenden: language + motivation = opportunity. With grammar, vocabulary, and pronunciation practice in every lesson, students are equipped with a solid foundation for successful speaking. Plus - an array of digital resources provides even more choice and flexibility. Students can learn in the classroom or on the move with Online Practice. language assessment. The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

As the global population grows and many developing countries modernize, the importance of water supply and wastewater treatment becomes a much greater factor in the welfare of nations. Clearly, in today's world the competition for water resources coupled with the unfortunate commingling of wastewater discharges with freshwater supplies creates additional pressure on treatment systems. Recently, researchers

focus on wastewater treatment by difference methods with minimal cost and maximum efficiency. This volume of the *Wastewater Engineering: Advanced Wastewater Treatment Systems* is a selection of topics related to physical-chemical and biological processes with an emphasis on their industrial applications. It gives an overview of various aspects in wastewater treatments methods including topics such as biological, bioremediation, electrochemical, membrane and physical-chemical applications. Experts in the area of environmental sciences from diverse institutions worldwide have contributed to this book, which should prove to be useful to students, teachers, and researchers in the disciplines of wastewater engineering, chemical engineering, environmental engineering, and biotechnology. We gratefully acknowledge the cooperation and support of all the contributing authors. *SIGMA 2018, Volume 2* Oxford University Press ICIEMS 2013 is to provide a platform for researchers, engineers, academicians as well as industrial professionals from all over the world to present their research results and development activities in Industrial Engineering and Management Science. This conference provides opportunities for the delegates to exchange new ideas and experiences face to face, to establish business or research relations and to find global partners for future collaboration.

The Europa World Year Book 2007 Krishna Prakashan Media In This Book A Well-Known Historian Offers A Critical Study Of A New Aspect Of Modern Indian History: The Gradual Introduction Of English Law Into India From The Advent Of The East India Company Till The Culmination Of The Period Of Codification In The Closing Years Of The Nineteenth Century. Special Stress Has Been Laid On The Impact Of English Law On Administration, Economy, Society And Constitutional Development. New Light Has Been Thrown Not Only On The Development Of Legal, Judicial And Constitutional Systems But Also On The Complex Historical Process Of The Emergence Of Modern India.

The book is a collection of high-quality, peer-reviewed innovative research papers from the International Conference on Signals, Machines and Automation (SIGMA 2018) held at Netaji Subhas Institute of Technology (NSIT), Delhi, India. The conference offered researchers from academic and industry the opportunity to present their original work and exchange ideas, information, techniques and applications in the field of computational intelligence, artificial intelligence and machine intelligence. The book is divided into two volumes discussing a wide variety of industrial, engineering and scientific applications of the emerging techniques.

This book collection of 45 chapters draws on the diverse insights of the Post Covid-19 challenges and opportunities to look ahead and across a broad range of issues - education, trade, governance, health, labour, technology to name a few - and consider where the balance of risk and opportunity may come out. It offers decision-makers a comprehensive picture of expected long term changes, and inspiration to leverage the opportunities this crisis offers to improve the state of the world. Academicians must find and establish a new equilibrium and a new normal for learning amidst the present challenges.

The Far East and Australasia 2003 Krishna Prakashan Media Covers chemistry, physics, engineering, and therapeutic aspects of packaging—universal to pharmaceutical, medical, and food applications. This book covers the chemistry, physics, materials science, engineering, and therapeutic aspects of many different types of packaging materials, emphasizing throughout the applicability of various aspects of packaging science and technology. It also provides a simultaneous discussion of interrelated fields, and addresses the universal issues within these fields' application areas. Intended as a technical reference and as a study aid, it is relevant to anyone who studies or uses packaging or packaging materials. *Packaging Technology and Engineering: Pharmaceutical, Medical and Food Applications* begins with an overview of the history of the topic. It then offers chapters on the methods of obtaining raw materials, the chemistry of polymeric and non-polymeric packaging materials, physico-chemical quality parameters, and the manufacturing of packaging. Other topics look at: additives, use, suppliers, safety and environmental concerns, regulation, anti-fraud activities, new

trends, and the future of packaging technology. The book also features numerous problems and worked solutions to aid student comprehension. Covers packaging and packaging materials, their properties and technologies. Addresses the chemical engineering, physics, and chemistry of packaging materials, and the individual requirements for food, pharmaceutical, and medical device packaging. Includes current issues such as environmental concerns and sustainability, recycling and after-use, anti-counterfeiting technology, and packaging regulations and guidelines. *Packaging Technology and Engineering: Pharmaceutical, Medical and Food Applications* will appeal to all packaging technologists, scientists, and engineers in industry, and in regulatory agencies. It is also an excellent book for advanced students studying packaging courses, within pharmacy, pharmaceutical sciences, chemical sciences, biomedical sciences, medical sciences, engineering, product design and technology, and food science/technology.

NCERT Textbooks play the most vital role in developing student's understanding and knowledge about a subject and the concepts or topics covered under a particular subject. Keeping in mind this immense importance and significance of the NCERT Textbooks in mind, Arihant has come up with a unique book containing Questions-Answers of NCERT Textbook based questions. This book containing solutions to NCERT Textbook questions has been designed for the students studying in Class XII following the NCERT Textbook for English Core. The present book has been divided into three parts covering the syllabi of English Core for Class XI. Prose covers The Portrait of a Lady, The Browning Version, The Adventure, Silk Road, etc whereas Poetry section covers A Photograph, The Voice of the Rain, Childhood, Father to Son, etc and the Supplementary Reader section covers The Address, Ranga's Marriage, Mother's Day, Birth, The Tale of Melon City, etc. This book has been worked out with an aim of overall development of the students in such a way that it will help students define the way how to write the answers of the textbook based questions. The book covers selected NCERT Exemplar Problems which will help the students understand the type of questions and answers to be expected in the Class XII English Core Examination. Also each chapter in the book begins with a summary of the chapter which will help in effective understanding of the theme of the chapter and to make sure that the students will be able to answer all popular questions concerned to a particular chapter whether it is Long Answer Type or Short Answer Type Question. The book has been designed systematically in the simplest manner for easy comprehension of the chapters and their themes. For the overall benefit of students the book has been designed in such a way that it not only gives solutions to all the exercises but also gives detailed explanations which will help the students in learning the concepts and will enhance their thinking and learning abilities. As the book has been designed strictly according to the NCERT Textbook of English Core for Class XI and contains simplified text material in the form of class room notes and answers to all the questions in lucid language, it for sure will help the Class XI students in an effective way for English Core.
