Graceland in her beat-up red Saturn, both in need of refuge, both running from different things. Her bumper sticker reads "Humanity Is Trying." It's a triple entendre, she explains: Humanity is exhausting. Humanity is struggle. Humanity is doing the best it knows how. Humanity Is Trying is several books in one. It's a memoir about the love and the loss of a sister and a best friend. It's the story of a series of escape attempts—cowardly, courageous, harmful, and hopeful—experiments in freedom from the stories that limit us. And it's a record of spiritual, intellectual, and emotional growth with the help of friends, psychedelics, art, and spiritual practice. Qualitative research, particularly phenomenology, is increasingly popular as a method for midwifery and health-related research. These approaches enable rich and detailed explanations to be uncovered and bring experience to life. Important recommendations and practice-based implications may then be raised and debated for future use. This book brings together a range of phenomenological methods and insights into one accessible text. Illustrated with plenty of examples of successful phenomenological research, *Qualitative Research in Midwifery and Childbirth* keeps the focus applied to midwifery and childbirth and makes clear the links to practice throughout. The book introduces three key phenomenological approaches – descriptive, interpretive and the life world – and includes a comparative chapter which discusses the differences between these varied perspectives and methods. Each chapter focuses on how these approaches are used within midwifery research. The remaining chapters present a number of different research projects. These demonstrate how different phenomenological approaches have been used to explore and uncover experiences of childbirth and maternity as well as offering important insights into how women experience different facets of the birth experience during the antenatal, intra-partum and postnatal period. Designed for researchers and students undertaking research projects on midwifery and childbirth, this text includes contributions from a range of international and highly regarded phenomenological authors and researchers.
