A Contrastive Analysis of English and Tamil to Teach English as a Foreign Language in India GRIN Verlag

Seminar paper from the year 2017 in the subject English Language and Literature Studies - Linguistics, grade: 1,3, University of Mannheim, language: English, abstract: This paper is going to provide an insight into contrasts between the English and German language. Due to a shared origin from the Indo-European languages, the two languages are perceived to be similar enough to have sufficient things in common in order to establish comparability but are at the same time also distinctive enough to show significant contrasts. The essential theme of this paper argues that English and German may exhibit formal parallels on the surface, however, accommodate very different underlying usages and internal structures. Due to a limited length of this paper the discussion of contrasts is restricted to the resultative and narrative usage of the Present Perfect tense as well as to declarative main clauses in the syntax.

A Contrastive Analysis
Seminar paper from the year 2011 in the subject English - Grammar, Style, Working Technique, grade: 14, University of Marburg, course: Problems of English Grammar, language: English, abstract: This work is titled "A Contrastive Analysis of the English and the German Sound System. Problems and Suggestions for Teaching." The features of sound in a language are systematically structured. They are divided into two main branches: (a) the branch of segmental features including consonants and vowels, and (b) the branch of supra-segmental features including stress, intonation, pause, juncture, and rhythm (Nasr 1997: 2). My paper refers to branch (a) and illustrates the differences between the English (RP) and German consonant and vowel systems. The resulting contrasts reveal the main difficulties German learners of English are confronted with, therefore, these need to be exposed in teaching (Kufner 1971: 36). After contrasting the sound systems, I will comment on the aim and importance of learning English pronunciation, and then I will explain the error degrees caused by the sound contrasts. Later, there is an overview of the most important qualifications of a phonetic teacher, and finally I will provide suggestions for teaching the pronunciation difficulties caused by the differences between the two languages.

Further Insights into Contrastive Analysis GRIN Verlag

After a period of crisis in the 1960s, Contrastive Analysis has now regained its firm position, although in a different form and with broader goals. This collection of papers reflects the scope of research and the range of interest of linguists who are involved in contrastive linguistics research. The volume contains 35 contributions by 37 authors from 13 different countries and includes an Index of names and an Index of terms.
