The Bible predicts the future, but scholars widely disagree on what the Bible says! How can the average person sort out fact from fiction? Daniel 12:10 boldly states that the wise will understand prophetic chronology in the last days. Have those days already begun? Retired hi-tech inventor and author Herbert R. Stollorz discovered that the dates of many key events predicted in the books of Daniel and Revelation fall between the

years 2008 and 2018. Two of the keys that unlocked this mystery are the Hebrew Alphabet Number System and the Jewish feast and fast days. One of those fast days, Tammuz 17, commemorates the fall of Jerusalem prior to the destruction of God's Temple in that ancient city.

The Liturgy of Creation WestBow Press

The Scriptures reveal that when we enter the latter days, we'll find ourselves in an increasingly chaotic world where godlessness and lawlessness rule the day. During this time, God's word will be neglected and twisted for self-serving agendas; truth will become subjective and relative; and entertainment, idolatry, liturgy, and rituals will replace the Lord Jesus from being the central focus of worship in mainline churches. In this Bible-based chronology, the author examines where we are on God's timeline, and more importantly, why it's not too late to benefit from God's incredible message of creation, redemption, and eternal life. Importantly, for these end-times, the Bible contains an amazingly accurate timeline dating from the Creation to the Second Coming. It's been intentionally hidden, but specific windows of time highlight the latter days. Celebrate God's imminent return and learn about the specific generation that will "see all these things" before it passes away so that we, as children of light, should not let the day of the Lord's return overtake us as a thief in the night.

Setting the Spiritual Clock Bloomsbury Publishing USA

Our most basic relationship with the world is one of technological mediation. Nowadays our available tools are digital, and increasingly what counts in economic, social, and cultural life is what can be digitally stored, distributed, replayed, augmented, and switched. Yet the digital remains very much materially configured, and though it now permeates nearly all human life it has not eclipsed all older technologies. This Handbook is grounded in an understanding that our technologically mediated condition is a condition of organization. It maps and theorizes the largely uncharted territory of media, technology, and organization studies. Written by scholars of organization and theorists of media and technology, the chapters focus on specific, and specifically mediating, objects that shape the practices, processes, and effects of organization. It is in this spirit that each chapter focuses on a specific technological object, such as the Battery, Clock, High Heels, Container, or Smartphone, asking the question, how does this object or process organize? In staying with the object the chapters remain committed to the everyday, empirical world, rather than being confined to established disciplinary concerns and theoretical developments. As the first sustained and systematic interrogation of the relation between technologies, media, and organization, this Handbook consolidates, deepens, and further develops the empirics and concepts required to make sense of the material forces of organization.
