A key concern for educators, administrators, professional support services personnel, parents and policy makers are barriers to learning, particularly student mental health. Statistics reveal that up to 20 percent of children and youth have mental health issues and up to 80 percent do not receive proper intervention. *Barriers to Learning* enables readers to gain valuable insight into the challenges presented in classrooms today. This

book presents a unique classification and review of various mental health and learning issues. The authors link current education and child and youth mental health reforms to make the case for improving services to address barriers to learning. This book includes a unique School-based Integrated Student Support Model (SISSM), which, within the context of exceptional school leadership and instruction, provides a framework for timely and evidence-based

integrated and collaborative services to reduce, manage, and prevent barriers to learning for all students. *The Saturday Review of Politics, Literature, Science and Art* Grey House Publishing

The Scandinavian presence has been felt in many parts of Canada, including the Windsor-Detroit border region. A Scandinavian Heritage surveys the numerous contributions made in this area by the people of 5 nations: Denmark, Norway, Sweden, Finland,

and Iceland. The history of these people, from the first settlers to the present is explored in detail. The experiences common to each of the nationalities are shown and contrasted to the unique perspective brought by each group to this country. Included is a survey reflecting the experiences of the present-day Scandinavian community. To highlight this special history, Joan Magee has included an ample selection of photographs and illustrations.

This book explores the recent trend toward the transformation of religious symbols and practices

into culture in Western democracies. Analyses of three legal cases involving religion in the public sphere are used to illuminate this trend: a municipal council chamber; a town hall; and town board meetings. Each case involves a different national context—Canada, France and the United States—and each illustrates something interesting about the shape-shifting nature of religion, specifically its flexibility and dexterity in the face of the secular,

the religious and the plural. Despite the differences in national contexts, in each instance religion is transformed into culture or heritage by the courts to justify or excuse its presence and to distance the state from the possibility that it is violating legal norms of distance from religion. The cultural practice or symbol is represented as a shared national value or activity. Transforming the ‘Other’ into ‘Us’ through reconstitution is also possible. Finally, anxiety about the ‘Other’

becomes part of the story of rendering religion as culture, resulting in the impugning of anyone who dares to question the putative shared culture. The book will be essential reading for students, academics and policy-makers working in the areas of sociology of religion, religious studies, socio-legal studies, law and public policy, constitutional law, religion and politics, and cultural studies.

This Handbook brings

together foundational and leading-edge research exploring dimensions of improving quality of life in communities of place. Social indicators and other assessment techniques will be explored, including from the framework of community perspectives which is concerned with enhancing quality of life for community members. As part of this trans-disciplinary work, participation, engagement, and empowerment will be key concepts presented.

Along with capacity building and service provision, these elements influence community well-being and will be considered along with subjective and objective assessment approaches. Researchers from around the globe share their work on this important topic of community well-being, bringing together a diverse array of disciplinary perspectives. Those working in the areas of public policy, community development, community and social psychology, urban and

regional planning, and sustainable development will find this volume particularly useful for the array of approaches presented.

Why do men rape women? This is a question for which there are many political, psychological, and sociological answers, but few historical ones. *Improper Advances* is one of the first books to explore the history of sexual violence in any country. A study of women, men, and sexual crime in rural and northern Ontario, it expands the terms of current debates about sexuality and sexual

violence. Karen Dubinsky relies on criminal case files, a revealing but largely untapped source for social historians, to retell individual stories of sexual danger—crimes such as rape, abortion, seduction, murder, and infanticide. Her research supports many feminist analyses of sexual violence: that crimes are expressions of power, that courts are prejudiced by the victim's background, and that most assaults occur within the victims' homes and communities. Dubinsky distinguishes

herself from most feminist scholars, however, by refusing to view women solely as victims and sex as a tool of oppression. She finds that these women actively sought and took pleasure in sexuality, but they distinguished between wanted and unwanted sexual encounters and attempted to punish coercive sex despite obstacles in the court system and the community. Confronting a number of key theoretical and historiographic controversies, including

recent debates over sexuality in feminist theory and politics, she challenges current thinking on the history of women, gender, and sexuality.

There has been increased interest among scholars in recent decades focused on the intersection of family and religion. Yet, there is still much that is not well-understood in this area. This aim of this special issue is to further explore the influence of religion on family life. In particular, this issue

includes a collection of studies from leading scholars on religion and family life that focus on ways in which religion and spirituality may influence various aspects of family life including family processes, family structure, family formation, family dissolution, parenting, and family relationships. The studies included incorporate both qualitative and quantitative analyses, incorporate a number of different religious traditions, focus on

religiosity among both adults and youth, and explore a number of important issues such as depression, intimacy, sexual behavior, lying, divorce, and faith transmission.
