The White Island is, and always has been, a magnet for hedonists. Its history reads like a history of pleasure itself. It is also a story of invasions and migrations, of artists and comen, of

drop-outs and love-ins. The Carthaginians established a cult to their goddess of sex there, and named the island after Bez, their god of dance. Roman centurions in need of a bit of down time between campaigns would go to Ibiza to get their kicks. And over the centuries, cultures around the Med have used the island either as a playground or a dump for the kind of people who didn't quite fit in back home, but who you'd probably quite like to meet at a party... This is the history of Ibiza, the fantasy island, framed by one long, golden summer where anything can happen - and it usually does.

First Published in 2000. This is the fourth edition of a handbook that has already become well-known to many academic staff. Its popularity rests on the way it presents ideas about teaching and learning underpinned by research findings, but in a form that provides detailed, helpful advice for teachers in higher education. The Handbook could be used to support any of the many training programmes being introduced into colleges and universities around the world, as indeed previous editions have already done. The various chapters focus on the specific skills that are dealt

with in such programmes: large-group and small-group teaching, methods of assessment and so on. They also include advice on how to present conference papers, an area where advice seems sorely lacking.

The 2018 FAO-OIE-WHO (Tripartite) zoonoses guide, "Taking A Multisectoral, One Health Approach: A Tripartite Guide to Addressing Zoonotic Diseases in Countries" (2018 TZG) is being jointly developed to provide member countries with practical guidance on OH approaches to build national mechanisms for multisectoral coordination, communication, and collaboration to address zoonotic disease threats at the animal-human-environment interface. The 2018 TZG updates and expands on the guidance in the one previous jointly-developed, zoonoses-specific guidance document: the 2008 Tripartite "Zoonotic Diseases: A Guide to Establishing Collaboration between Animal and Human Health Sectors at the Country Level", developed in WHO South-East Asia Region and Western Pacific Region. The 2018 TZG supports building by countries of the resilience and capacity to address emerging and endemic zoonotic diseases such as avian influenza, rabies, Ebola, and Rift Valley fever, as well as food-borne diseases and antimicrobial resistance, and to minimize their impacts on health, livelihoods, and economies. It additionally supports country efforts to implement WHO International Health Regulations (2005) and OIE international standards, to address gaps identified through external and internal health system evaluations, and to achieve targets of the Sustainable Development Goals. The 2018 TZG provides relevant country ministries and agencies with lessons learned and good

practices identified from country-level experiences in taking OH approaches for preparedness, prevention, detection and response to zoonotic disease threats, and provides guidance on multisectoral communication, coordination, and collaboration. It informs on regional and country-level OH activities and relevant unisectoral and multisectoral tools available for countries to use.
