GLORIA ERICKSON

Texas Monthly Lorenz Books

Since 1973, TEXAS MONTHLY has chronicled life in contemporary Texas, reporting on vital issues such as politics, the environment, industry, and education. As a leisure

guide, TEXAS MONTHLY continues to be the indispensable authority on the Texas scene, covering music, the arts, travel, restaurants, museums, and cultural events with its insightful recommendations. *An Investigation into the Origins of the Modern World* Grand Central Publishing
A deliciously quirky

crime novel from David McCallum, the beloved actor known for his portrayal of Illya Kuryakin on *The Man From U.N.C.L.E.* and Dr. Donald "Ducky" Mallard on *NCIS*. Crime pays. And pays well. Sal, Max and Enzo Bruschetti have proved this over a lifetime of nefarious activity that they have kept hidden from law enforcement. Nowhere in any file, on any computer is there a record of anything illegal from which they have profited. But Max has a problem. His body is getting old and his doctor has told him to take it easy. Max has decided that the time has come for the family to retire. But when young actor Harry Murphy overhears the Bruschetti brothers planning changes to

their organization, including the murder of a man in London who knows too much, the Bruschetti's plans begin to unravel. After Harry makes the well-intentioned if egregious mistake of trying to warn the Bruchetti's intended victim he finds himself alone in a foreign country, on the wrong side of the law, with a suitcase full of cash and a dangerous man on his trail. And while his good looks, charm and cheerful persistence may prove assets in the turbulent events that follow, none of Harry's past roles have prepared him for what happens next. At turns tense and funny, *Once a Crooked Man* is infused with the infectious charm that has made David McCallum one of

television's longest running, most-beloved stars.

It was a catastrophe without precedent in recorded history: for months on end, starting in A.D. 535, a strange, dusky haze robbed much of the earth of normal sunlight. Crops failed in Asia and the Middle East as global weather patterns radically altered. Bubonic plague, exploding out of Africa, wiped out entire populations in Europe. Flood and drought brought ancient cultures to the brink of collapse. In a matter of decades, the old order died and a new world—essentially the modern world as we know it today—began to emerge. In this fascinating, groundbreaking, totally accessible book, archaeological

journalist David Keys dramatically reconstructs the global chain of revolutions that began in the catastrophe of A.D. 535, then offers a definitive explanation of how and why this cataclysm occurred on that momentous day centuries ago. The Roman Empire, the greatest power in Europe and the Middle East for centuries, lost half its territory in the century following the catastrophe. During the exact same period, the ancient southern Chinese state, weakened by economic turmoil, succumbed to invaders from the north, and a single unified China was born. Meanwhile, as restless tribes swept down from the central Asian steppes, a new religion known as Islam spread

through the Middle East. As Keys demonstrates with compelling originality and authoritative research, these were not isolated upheavals but linked events arising from the same cause and rippling around the world like an enormous tidal wave. Keys's narrative circles the globe as he identifies the eerie fallout from the months of darkness: unprecedented drought in Central America, a strange yellow dust drifting like snow over eastern Asia, prolonged famine, and the hideous pandemic of the bubonic plague. With a superb command of ancient literatures and historical records, Keys makes hitherto unrecognized

connections between the "wasteland" that overspread the British countryside and the fall of the great pyramid-building Teotihuacan civilization in Mexico, between a little-known "Jewish empire" in Eastern Europe and the rise of the Japanese nation-state, between storms in France and pestilence in Ireland. In the book's final chapters, Keys delves into the mystery at the heart of this global catastrophe: Why did it happen? The answer, at once surprising and definitive, holds chilling implications for our own precarious geopolitical future. Wide-ranging in its scholarship, written with flair and passion, filled with original insights, *Catastrophe* is a superb synthesis of history, science, and

cultural interpretation.

Art in America

Cambridge University Press

It is an intrinsic part of human nature to want to know what the future holds for us. The future is a voyage we are trying to navigate safely and skillfully, yet we face a journey through uncharted waters, aware that there are events that we cannot control. In this informative, easy-to-read book you will discover that, although the only certainty in life is change, there are patterns in change that can be identified, and over the centuries many different cultures have developed systems of divination to help us gain greater knowledge about ourselves and our future lives. Palm reading, the I Ching

and the Tarot have all, since ancient times, relied on the predictability of change, and can offer astonishing insights. If you are looking for a greater understanding of yourself, or simply want to learn about the arts of prophecy, then this fascinating book will give you all the information you need. Book jacket.

Texas Monthly Grand Central Publishing

After Bourne is ambushed and nearly killed while in Indonesia, he fakes his death to take on a new identity and mission- to find out who is trying to assassinate him. In the process, Bourne begins to question who he really is and what he would become if he no longer carried the Bourne identity. Across the globe, an American

passenger airliner is shot down over Egypt- apparently by an Iranian missile- leaving the world wondering if it was an accident or an act of aggression. A massive global team lead by Soraya Moore is assembled to investigate the attack before the situation escalates. When Bourne's search for his would-be assassin intersects with Soraya's search for the group behind the airplane bombing, Bourne is thrust into a race to prevent a new world war. But it may already be too late.

The Genealogist's Address Book

Jason Bourne returns to Georgetown University and the mild world of his alter ego, David Webb, hoping for normalcy. But after so many adrenaline-soaked years of risking his life, Bourne finds himself chafing under the quiet life of a linguistics professor. Aware of his frustrations, his academic mentor, Professor Specter, asks for help investigating the murder of a former student by a previously

unknown Muslim extremist sect. The young man died carrying information about the group's terrorist activities, including an immediate plan to attack the United States. The organization, the Black Legion, and its lethal plot have also popped up on the radar of Central Intelligence, where new director Veronica Hart is struggling to assert her authority. Sensing an opportunity to take control of CI by showing Hart's incompetence, National Security Agency operatives plan to accomplish what CI never could-hunt down and kill Bourne. In Europe, Bourne's investigation into the Black Legion turns into one of the deadliest and most tangled

operations of his double life-the pursuit of the leader of a murderous terrorist group with roots in the darkest days of World War II-all while an assassin as brilliant and damaged as himself is getting closer by the minute . . .

This greatly expanded third edition provides a comprehensive overview of clinical psychopharmacology, incorporating the major advances in the field since the previous edition's publication. Renowned experts from psychiatry, pharmacy, and nursing have integrated basic science, psychopharmacology, and clinical practice throughout the book in order to provide a thorough basis for prescribing. It covers all key psychiatric drugs and disorders and includes the latest data on efficacy, safety and tolerability.

Adopting a pragmatic approach to drug nomenclature, both Neuroscience-based Nomenclature (NbN) and older generic terminology are included in the text reflecting that clinicians are likely to use both systems. Many chapters refer to current National Institute of Health and Care Excellence (NICE) guidelines, making this a crucial resource. Edited by leading authorities in the field, Professor Peter M. Haddad and Professor David J. Nutt, Seminars in Clinical Psychopharmacology emphasises evidence-based prescribing with the aim of achieving better clinical outcomes for patients.
